Norman Sanders, 2021-01-06 This book covers the history of an important window of the computer era from about 1950 to 1970 No one proclaimed it computing evolved haphazardly as people and equipment sparked progress Academics and engineers invented the computer in several places at more or less the same time but it was a different profession programming that ushered it into business government and defence More recently of course computing in the form of phones and tablets has become accessible to over five billion people around the world What was originally intended solely as an arithmetic machine evolved in less than a century into a cornerstone of global society No one saw this coming The book will appeal to historians and teachers of technology and sociology it should also resonate with managers technologists and politicians In addition anyone who has ever wondered where the phone in their pocket came from or how their PC and iPad came to be will also be interested in the early days of computing how the pioneers laid the platform to the global social revolution which is still upon us **Touch** Gabriel Josipovici, 1996-09-25 In this new book a preeminent literary thinker muses over the central question of how we can feel at home in the world given that the world is independent of and indifferent to our wishes Drawing on books and films cultural history and his own experiences Gabriel Josipovici argues that

it is possible to feel comfortable in the world and in our relationships with others only if we value touch over sight if we respect distance but also work to overcome it Josipovici moves from a Charlie Chaplin film to passages from Proust from the world of sport to the world of addiction from medieval pilgrimages to the cult of relics from a wedding photograph of his grandparents to some of Chardin's most enigmatic paintings Through these seemingly disparate topics he provides engaging and wise commentary on connection and communication in life Contrasting the senses of sight and touch Josipovici notes that although sight seems to give us the totality of what we behold it is only when we walk or feel our way across the distances that things become more than images and begin to constitute the world in which we as touchers and not mere observers are included If we depend on sight which seems to offer a frictionless domination over reality we may avoid the pains and uncertainties of living but we also lose our involvement with life

He was overzealous, headstrong and extremely impatient while fulfilling his desires on his terms. First, then demanding that God bless it all. Just as Nash skillfully shaped his next career steps, he was unexpectedly swept away by a current that would divinely reset his career trajectory and ultimately save his life. In this inspirational memoir, Nash reveals how, with his dreams hanging in the balance, he was relocated from his childhood home while suffering from the internalized side effects of fatherlessness. Childhood trauma he mistakenly believed was wiped from his memories and an estranged relationship with God. As he chronicles his experiences, Nash offers a candid glimpse into the world of a broken man who hit rock bottom, discovered God was the rock at the bottom and embraced the necessary waves of character transformation that would propel him into an unfathomable experience he could have never envisioned. *Undertow* is the true story of one man's experiences in uncharted waters as he surrendered rebellion and pride and courageously rode a wave that eventually
