FEATURES

REQUIREMENTS

- Do not turn the light on before the battery is fully charged. Charge the battery by keeping the switch in the OFF position. Plug the solar panel cable into the bottom of the battery case. Point the solar panel directly at the noon sun for 3 sunny days. If not fully charged, the unit will not work.
- When FULLY charged, the solar light will operate a maximum of 15 days without sunlight. Actual operating time will vary depending upon how frequently the light is triggered.

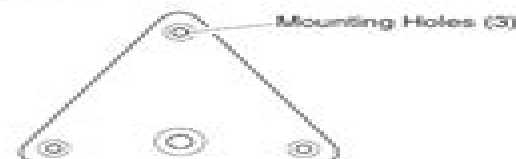

UNPACKING

Be sure to remove all contents from packaging and verify all items are present before assembling this light fixture. This package includes the following items:

INSTALLATION

For best performance, mount the fixture about 8 feet (2.4 m) above the ground.

Three Mounting Holes for Solar Panel Base

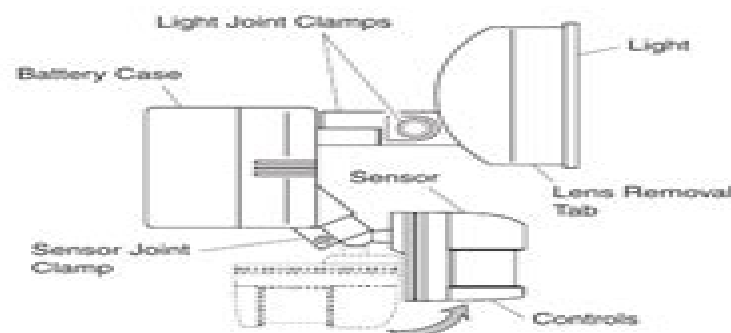

1. Mount solar panel base on a solid surface using three tapered screws. Adjust the panel to point directly at the noon sun. Avoid obstructions such as trees or buildings that may block sun light. Allow for enough wire to reach the case.

Note: You will want to re-aim the solar panel as the seasons change to keep it pointed directly at the noon sun.

2. Mount the battery case on a solid surface using two round-head screws and the keyholes on the back of the case.
3. Adjust sensor. For proper operation, the sensor head must be rotated so that the sensor controls face downward as shown below.

IMPORTANT: The controls must face downward to avoid damage from rain. If controls face upward, move sensor to the original down position, rotate 180°, then raise to the position shown below.

4. Plug the solar panel cable into the bottom of the battery case. **IMPORTANT:** Allow the battery to charge with three days of sunshine before testing.
