refereed proceedings of the 7th International Conference on Adaptive Instructional Systems AIS 2025 held as part of the 27th HCI International Conference on Human Computer Interaction HCII 2025 which took place in Gothenburg Sweden in June 2025 The total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from 7972 submissions The two volumes cover topics as follows Part I Adaptive Training and Education Cognitive Modeling of Adaptive Instructional Systems Part II Adaptive and Personalized Learning Emerging Technologies in Adaptive Instruction **HELP: A Dynamic Hospital Information System** Gilad J. Kuperman, Reed M. Gardner, T. Allan Pryor, 2013-03-12 This monograph series is intended to provide medical information scientists health care administrators health care providers and computer science professionals with successful examples and experiences of computer applications in health care settings Through the exposition of these computer applications we attempt to show what is effective and efficient and hopefully provide some guidance on the acquisition or design of information systems so that costly mistakes can be avoided The health care industry is currently being pushed and pulled from all directions from the clinical side to increase quality of care from the business side to improve financial stability from the legal and regulatory sides to provide more detailed documentation and in a university environment to provide more data for research and improved opportunities for education Medical information systems sit in the middle of all these demands They are not only asked to provide more better and more timely information but also to interact with and monitor the process of health care itself by providing clinical reminders warnings about adverse drug interactions alerts to questionable treatment alarms for security breaches mail messages workload schedules etc Clearly medical information systems are functionally very rich and demand quick response time and a high level of security They can be classified as very complex systems and from a developer's perspective as risky systems
