Ikea Malm Bed Manual:

Propelled Andreas Elpidorou, 2020-04-24 In *Propelled* Andreas Elpidorou makes a lively case for the value of discontent and illustrates how boredom frustration and anticipation are good for us Weaving together stories from disciplines as wide ranging as classical literature and video games Elpidorou shows that these psychological states illuminate our desires and expectations and inform us when we find ourselves stuck in unpleasant and unfulfilling situations Boredom frustration and anticipation aren't obstacles to our goals they are our guides propelling us into lives that are truly our own *Comparison of the Two Life Cycle Assessments of Bed MALM by Inter IKEA Systems B.V. and Bed Bett 2.0 by ROOM IN A BOX GmbH&Co. KG Regarding to Their Environmental Impact Within Defined Impact Categories* Chiara Fahrthofer, 2020 Most of the world's population owns a bed and will buy one more than once in their lifetimes Such a product can be a good step towards a sustainable purchase decision due to its widespread distribution and the tangibility for the customer Therefore it's important to think about a sustainable design for such a product for an affordable price In the present master thesis a bed from the well known IKEA Systems B V is being assessed and analysed It will be compared to a bed model which according to the manufacturer is supposed to represent a more sustainable and fully fledged bed alternative Both objects have the outer dimensions of a classic single bed of 90 x 200 cm and are in a similar price segment with the purchase prices of 99 90 and 159 00 Both companies have a similar target group which are students young adults and young families¹ This report is intended to provide insights into whether the considerations and design approaches of the company ROOM IN A BOX which produces the second bed model Bett 2 0 have the desired effect and whether their product is more sustainable than a conventional bed represented by bed MALM from IKEA The results show that Bett 2 0 has a lower environmental impact The product could cut back its emissions thanks to its regional production as the long transport distances of bed MALM make a significant contribution to the final LCA results As expected the amount of material used is also relevant for the environmental impact as raw materials such as wood would have a lower LCA than steel but due to the larger quantity used it ultimately contributes to a larger share of the negative environmental impact **Ikea** Ikea (Firm), 2018
