We use the **=PMT** function. Arguments (things needed from the function in the parentheses) for the function are Rate, Number of Periods, and Present Value (PV, or AMOUNT of the loan).

The rate is always is B22, the Number of Periods needs to be multiplied by 12 since we're given YEARS and we want a MONTHLY payment (12 months in one year), and the Amount is listed in E5. We put a negative sign on amount because we want the payment to come back positive.

So the full function is:
=PMT(\$B\$22/12,F5*12,-E5)

11	Copy the formula from cell G5 to the range G6:G11.	7
12	Apply Accounting number format to the range G5:G11.	3
13	Calculate totals in cells C12, E12, and G12. Use the =Sum function, first in C12, and then copy to E12 and G12. AutoFit the column sizes.	7
