The Autopage Starter with Remote Entry System has been designed to be installed on transportation vehicles with an automatic transmission (AT).

Should install the vehicle system on a vehicle with an automatic transmission.

This system must be installed and tested through a safety switch so it will not start in any forward or reverse gear.

Some automatic transmission vehicles having other AT vehicles with a remote starter may have a mechanical-type gear safety switch instead of electrical safety switch. The mechanical type does not interrupt the starter circuit when the transmission is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical-type gear safety switch.

Once you install this system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

Read the operation manual for operating the system.

Do not install any component near the battery, gas pedal or starting switch.

Some vehicles have a factory installed transponder immobilizer system that can severely compromise the installation. There is a possibility that the system cannot be installed on some immobilizer-equipped vehicles.

Many vehicles have an AT or any system, the vehicle can start and do not provide any level of the AT system.

Disconnect the air battery before beginning work on the vehicle.

Check battery grounds before driving any vehicle. Ensure that no wiring harness or other components are located between the battery that would otherwise be damaged.

Do not use conventional jump box, battery or any wiring that wiring, i.e. repair parts will possibly obstruct connectivity into the start system and may result in false alarm or incorrect operation. The suggested installing of connection points.

Install the wiring neatly under carpets or under seat to prevent possible damage to wires.
