Beyond Control James F. Barnett Jr., 2017-03-16 *Beyond Control* reveals the Mississippi as a waterway of change unnaturally confined by ever larger levees and control structures During the great flood of 1973 the current scoured a hole beneath the main structure near Baton Rouge and enlarged a pre-existing football field size crater That night the Mississippi River nearly changed its course for a shorter and steeper path to the sea Such a map-changing reconfiguration of the country's largest river would bear national significance as well as disastrous consequences for New Orleans and towns like Morgan City at the mouth of the Atchafalaya River Since 1973 the US Army Corps of Engineers Control Complex at Old River has kept the Mississippi from jumping out of its historic channel and plunging through the Atchafalaya Basin to the Gulf of Mexico *Beyond Control* traces the history of this phenomenon beginning with a major channel shift around 3 000 years ago By the time European colonists began to explore the Lower Mississippi Valley a unique confluence of waterways had formed where the Red River joined the Mississippi and the Atchafalaya River flowed out into the Atchafalaya Basin A series of human alterations to this potentially volatile web of rivers starting with a bend cutoff in 1831 by Captain Henry Miller Shreve set the forces in motion for the Mississippi's move into the Atchafalaya Basin Told against the backdrop of the Lower Mississippi River's impending diversion the book's chapters chronicle historic floods rising flood crests a changing strategy for flood protection and competing interests in the management of the Old River outlet *Beyond Control* is both a history and a close look at an inexorable living process happening now in the twenty-first century

Climax at Gallipoli Rhys Crawley, 2014-03-19 Gallipoli the mere name summons the story of this well-known campaign of the First World War And the story of Gallipoli where in August 1915 the Allied forces made their last valiant effort against the Turks is one of infamous might have beens If only the Allies had held out a little longer pushed a little harder had better luck Gallipoli might have been the decisive triumph that knocked the Ottoman Empire out of the First World War But the story is just that author Rhys Crawley tells us a story Not only was the outcome at Gallipoli not close but the operation was flawed from the start and an inevitable failure A painstaking effort to set the historical record straight *Climax at Gallipoli* examines the performance of

the Allies Mediterranean Expeditionary Force from the beginning of the Gallipoli Campaign to the bitter end Crawley reminds us that in 1915 the second year of the war the Allies were still trying to adapt to a new form of warfare with static defense replacing the maneuver and offensive strategies of earlier British doctrine In the attempt both the MEF at Gallipoli and the British Expeditionary Force on the Western Front aimed for too much and both failed To explain why Crawley focuses on the operational level of war in the campaign scrutinizing planning command mobility fire support interservice cooperation and logistics His work draws on unprecedented research into the files of military organizations across the United Kingdom and Australia The result is a view of the Gallipoli Campaign unique in its detail and scope as well as in its conclusions a book that looks past myth and distortion to the facts and the truth of what happened at this critical juncture in twentieth century history

Technological Innovation in Legacy Sectors William B. Bonvillian,Charles Weiss,2015-08-18 The American economy faces two deep problems expanding innovation and raising the rate of quality job creation Both have roots in a neglected problem the resistance of Legacy economic sectors to innovation While the U S has focused its policies on breakthrough innovations to create new economic frontiers like information technology and biotechnology most of its economy is locked into Legacy sectors defended by technological economic political social paradigms that block competition from disruptive innovations that could challenge their models Americans like to build technology covered wagons and take them out west to open new innovation frontiers we don t head our wagons back east to bring innovation to our Legacy sectors By failing to do so the economy misses a major opportunity for innovation which is the bedrock of U S competitiveness and its standard of living Technological Innovation in Legacy Sectors uses a new unifying conceptual framework to identify the shared features underlying structural obstacles to innovation in major Legacy sectors energy air and auto transport the electric power grid buildings manufacturing agriculture health care delivery and higher education and develops approaches to understand and transform them It finds both strengths and obstacles to innovation in the national innovation environments a new concept that combines the innovation system and the broader innovation context for a group of Asian and European economies Manufacturing is a major Legacy sector that presents a particular challenge because it is a critical stage in the innovation process By increasingly offshoring production the U S is losing important parts of its innovation capacity Innovate here produce here where the U S took all the gains of its strong innovation system at every stage is being replaced by innovate here produce there which threatens to lead to produce there innovate there To bring innovation to Legacy sectors authors William Bonvillian and Charles Weiss recommend that policymakers focus on all stages of innovation from research through implementation They should fill institutional gaps in the innovation system and take measures to address structural obstacles to needed disruptive innovations In the specific case of advanced

Davis,2017-08-08 In the 1960s and 70s a diverse range of storefronts including head shops African American bookstores feminist businesses and organic grocers brought the work of the New Left Black Power feminism environmentalism and other movements into the marketplace Through shared ownership limited growth and democratic workplaces these activist entrepreneurs offered alternatives to conventional profit driven corporate business models By the middle of the 1970s thousands of these enterprises operated across the United States but only a handful survive today Some such as Whole Foods Market have abandoned their quest for collective political change in favor of maximizing profits Vividly portraying the struggles successes and sacrifices of these unlikely entrepreneurs From Head Shops to Whole Foods writes a new history of social movements and capitalism by showing how activists embraced small businesses in a way few historians have considered The book challenges the widespread but mistaken idea that activism and political dissent are inherently antithetical to participation in the marketplace Joshua Clark Davis uncovers the historical roots of contemporary interest in ethical consumption social enterprise buying local and mission driven business while also showing how today s companies have adopted the language but not often the mission of liberation and social change Earned Citizenship Michael J. Sullivan,2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country Earned Citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the

United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole Earned Citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation
