**Beyond Control** James F. Barnett Jr., 2017-03-16 Beyond Control reveals the Mississippi as a waterway of change unnaturally confined by ever larger levees and control structures During the great flood of 1973 the current scoured a hole beneath the main structure near Baton Rouge and enlarged a pre existing football field size crater That night the Mississippi River nearly changed its course for a shorter and steeper path to the sea Such a map changing reconfiguration of the country's largest river would bear national significance as well as disastrous consequences for New Orleans and towns like Morgan City at the mouth of the Atchafalaya River Since 1973 the US Army Corps of Engineers Control Complex at Old River has kept the Mississippi from jumping out of its historic channel and plunging through the Atchafalaya Basin to the Gulf of Mexico Beyond Control traces the history of this phenomenon beginning with a major channel shift around 3 000 years ago By the time European colonists began to explore the Lower Mississippi Valley a unique confluence of waterways had formed where the Red River joined the Mississippi and the Atchafalaya River flowed out into the Atchafalaya Basin A series of human alterations to this potentially volatile web of rivers starting with a bend cutoff in 1831 by Captain Henry Miller Shreve set the

**Exclusion and Inclusion in International Migration: Power, Resistance and Identity**

Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and immigration enforcement in 2019 alone This edited volume is an exploration of the global landscapes inhabited by refugees and labour migrants although the focus is largely on the former Despite the fact that most of the empirical studies are drawn from within Europe the book also includes research on Nepal Australia the Middle East and Japan in order to reveal the truly global dimensions of migration and the regimes governing this Content INTRODUCTION by Arma an Teke Lloyd PART A Ideology and Governance of Migration CHAPTER 1 Coming to Terms with Liberal Democracy by the Populist Radical Right Parties of Western Europe Evidence from European Parliament Speeches over Minorities and Migration by Caner Tekin CHAPTER 2 A Forest with many trees Mapping migration governance and the dispersion of authority in Europe by Lisa Marie Borrelli Rebecca Mavin and Giorgia Trasciani CHAPTER 3 Policing Migrants in Transit and Upon Arrival The Bordering Tactic of Integration in Austria and Germany by Olivia Johnson PART B Regulations Suspension of Human Rights CHAPTER 4 Borders Exception and Sovereignty Australia s Migration Policies as Instruments of Suspension of Human Rights and
