Islam and the Liberal State Stephen H. Jones,2020-11-26 National identity and liberal democracy are recurrent themes in debates about Muslim minorities in the West Britain is no exception with politicians responding to claims about Muslims lack of integration by mandating the promotion of fundamental British values including democracy and individual liberty This book engages with both these themes addressing the lack of understanding about the character of British Islam and its relationship to the liberal state It charts a gradual but decisive shift in British institutions concerned with Islamic education Islamic law and Muslim representation since Muslims settled in the UK in large numbers in the 1950s Based on empirical research including interviews undertaken over a ten year period with Muslims and analysis of public events organized by Islamic institutions Stephen Jones challenges claims about the isolation of British Islamic organizations and shows that they have decisively shaped themselves around British public and institutional norms He argues that this amounts to the building of a distinctive British Islam Using this narrative the book makes the case for a variety of liberalism that is open to the expression of religious arguments in public and to associations between religious groups and the state It also offers a powerful challenge to claims about the insularity of British Islamic institutions by showing how the national orientation of Islam called for by British policymakers is in fact already happening

The New Politics of Transnational Labor Marissa Brookes,2019-03-15 Over the years many transnational labor alliances have succeeded in improving conditions for workers but many more have not In The New Politics of Transnational Labor Marissa Brookes explains why this dichotomy has occurred Using the coordination and context appropriate CCAP theory she assesses this divergence arguing that the success of transnational alliances hinges

not only on effective coordination across borders and within workers local organizations but also on their ability to exploit vulnerabilities in global value chains invoke national and international institutions and mobilize networks of stakeholders in ways that threaten employers core material interests Brookes uses six comparative case studies spanning four industries five countries and fifteen years From dockside labor disputes in Britain and Australia to service sector campaigns in the supermarket and private security industries to campaigns aimed at luxury hotels in Southeast Asia Brookes creates her new theoretical framework and speaks to debates in international and comparative political economy on the politics of economic globalization the viability of private governance and the impact of organized labor on economic inequality From this assessment Brookes provides a vital update to the international relations literature on non state actors and transnational activism and shows how we can understand the unique capacities labor has as a transnational actor *Routledge Handbook of Politics and Technology* Ulrich Hilpert, 2015-10-05 This handbook provides a comprehensive global survey of the politics of technology Written by an outstanding line up of distinguished scholars in the field the handbook covers all aspects of the relationship between politics and technology including Demand and support for new technologies and innovation by the state The effects of technology policies Technology development and innovation difference between various countries and regions Policy instruments and techno industrial innovation Dynamism and change as outcomes of government policies Driving forces for science and innovative development Forming the basis of this handbook are examples of regional development country studies and a rich variety of technologies as well as topical issues such as divergent political interests in relation to technology and the economic exploitation of technologies Employing a comparative and interdisciplinary approach in order to analyse the interplay between government activities and the development of new technologies this handbook will be an invaluable resource for all students scholars and practitioners working in the politics of technology public policy and policy analysis

Kosovo and Serbia Leandrit I. Mehmeti, Branislav Radeljic, 2017-06-17 Azan on the Moon is an in depth anthropological study of people s lives along the Pamir Highway in eastern Tajikistan Constructed in the 1930s in rugged high altitude terrain the road fundamentally altered the material and social fabric of this former Soviet outpost on the border with Afghanistan and China The highway initially brought sentiments of disconnection and hardship followed by Soviet modernization and development and ultimately a sense of distinction from bordering countries and urban centers that continues to this day Based on extensive fieldwork and through an analysis of construction mobility technology media development Islam and the state Till Mostowlansky shows how ideas of modernity are both challenged and reinforced in contemporary Tajikistan In the wake of China s rise in Central Asia people along the Pamir Highway strive to reconcile a modern future with a modern past Weaving together the road a population and a region Azan on the Moon presents a rich ethnography of global connections

They Saved the Crops Don Mitchell, 2012 At the outset of World War II California agriculture seemed to be on the cusp of change Many Californians reacting to the ravages of the Great Depression called for

a radical reorientation of the highly exploitative labor relations that had allowed the state to become such a productive farming frontier But with the importation of the first braceros guest workers from Mexico hired on an emergency basis after the United States entered the war an even more intense struggle ensued over how agriculture would be conducted in the state Esteemed geographer Don Mitchell argues that by delineating the need for cheap flexible farm labor as a problem and solving it via the importation of relatively disempowered migrant workers an alliance of growers and government actors committed the United States to an agricultural system that is in important respects still with us They Saved the Crops is a theoretically rich and stylistically innovative account of grower rapaciousness worker militancy rampant corruption and bureaucratic bias Mitchell shows that growers workers and officials confronted a series of problems that shaped and were shaped by the landscape itself For growers the problem was finding the right kind of labor at the right price at the right time Workers struggled for survival and attempted to win power in the face of economic exploitation and unremitting violence Bureaucrats tried to harness political power to meet the demands of as one put it the people whom we serve Drawing on a deep well of empirical materials from archives up and down the state Mitchell s account promises to be the definitive book about California agriculture in the turbulent decades of the mid twentieth century **Walled** Andréanne

Bissonnette,Élisabeth Vallet,2025 Thirty years after the first mile of border walls was constructed in the San Diego Tijuana region this volume invites readers to reflect on how the border has evolved and what durable impacts came from these initial fourteen miles of border walls and the 1 940 miles constructed since **Addressing Uncertainty about Future Airport**

Activity Levels in Airport Decision Making Ian S. Kincaid,2012 This report provides a guidebook on how to develop air traffic forecasts in the face of a broad range of uncertainties It is targeted at airport operators planners designers and other stakeholders involved in planning managing and financing of airports and it provides a systems analysis methodology that augments standard master planning and strategic planning approaches This methodology includes a set of tools for improving the understanding and application of risk and uncertainty in air traffic forecasts as well as for increasing overall effectiveness of airport planning and decision making In developing the guidebook the research team studied existing methods used in traditional master planning as well as methods that directly address risk and uncertainty and based on that fundamental research they created a straightforward and transparent systems analysis methodology for expanding and improving traditional planning practices applicable through a wide range of airport sizes The methods presented were tested through a series of case study applications that also helped to identify additional opportunities for future research and long term enhancements **Global Tensions in the Russian Orthodox Diaspora** Robert Collins,2022-12-30 This book

explores the tensions that have arisen in the diaspora as a result of large numbers of Russian migrants entering established overseas parishes following the collapse of the Soviet Union These tensions made more fervent by the increasing role of the Church as part of the expression of Russian identity and by the Church s entry into the global culture wars carry with them

alternative views of a range of key issues cosmopolitanism versus reservation liberalism versus conservatism and ecumenism versus dogmatism The book focuses on particular disputes discusses the broader debates and examines the wider context of how the Russian Orthodox Church is evolving overall Pnue Annuaire United Nations,2010-08-15 Saving More Than Seeds Catherine Phillips,2016-04-01 Saving More Than Seeds advances understandings of seed people relations with particular focus on seed saving The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socionatural conditions But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures

Property and Human Rights in a Global Context Ting Xu,Jean Allain,2016-03-24 Property as a human rights concern is manifested through its incorporation in international instruments and as a subject of the law through property related cases considered by international human rights organs Yet for the most part the relationship between property and human rights has been discussed in rather superficial terms lacking a clear substantive connection or common language That said the currents of globalisation have witnessed a new era of interrelation between these two areas of the law including the emergence of international intellectual property law and the recognition of indigenous claims which in fundamental ways speak to an engagement with human rights law This collection starts the conversation between human rights lawyers and property lawyers and explores analytical approaches to the increasing relationship between property and human rights in a global context The chapters engage with key theoretical and policy debates and range across three main themes The re evaluation of the public private divide in the law the tensions between the market and social justice in development and the balance between the rights of individuals and those of communities The chapters adopt a global comparative perspective and engage in case studies from countries including India Philippines Brazil the United States the United Kingdom and includes various regions of Africa and Europe

Smart Cities Mark Deakin,2013-08-22 Smart city development has emerged a major issue over the past 5 years Since the launch of IBM s Smart Planet and CISCO s Smart Cities and Communities programmes their potential to deliver on global sustainable development targets have captured the public s attention However despite this growing interest in the development of smart cities little has as yet been published that either sets out the state of the art or which offers a less than subjective arm s length and dispassionate account of their potential contribution This book brings together cutting edge research and the findings from technical development projects from leading authorities within the field to capture the transition to smart cities It explores what is understood about smart

cities playing particular attention on the governance modelling and analysis of the transition that smart cities seek to represent In paving the way for such a representation the book begins to account for the social capital of smart communities and begins the task of modelling their embedded intelligence through an analysis of what the embedded intelligence of smart cities contributes to the sustainability of urban development This innovative book offers an interdisciplinary perspective and shall be of interest to researchers policy analysts and technical experts involved in and responsible for the planning development and design of smart cities It will also be of particular value to final year undergraduate and postgraduate students interested in Geography Architecture and Planning

The Oxford Handbook of Irish Politics David M.

Farrell,Niamh Hardiman,2021-09-01 Ireland has enjoyed continuous democratic government for almost a century an unusual experience among countries that gained their independence in the 20th century But the way this works in practice has changed dramatically over time Ireland s colonial past had an enduring influence over political life for much of the time since independence enabling stable institutions of democratic accountability while also shaping a dismal record of economic under development and persistent emigration More recently membership of the EU has brought about far reaching transformation across almost all aspects of Irish life But if anything the paradoxes have only intensified Now one of the most open economies in the world Ireland has experienced both rapid growth and one of the most severe crashes in the wake of the Great Recession On some measures Ireland is among the most affluent countries in the world yet this is not the lived experience for many of its citizens Ireland is an unequivocally modern state yet public life continues to be marked by formative ideas and values in which tradition and modernity are held in often uneasy embrace It is a small state that has ambitions to leverage its distinctive place in the Atlantic and European worlds to carry more weight on the world stage Ireland continues to be deeply connected to Britain through ties of culture and trade now matters of deep concern in the context of Brexit And the old fault lines between North and South between Ireland and Britain which had been at the core of one of Europe s longest and bloodiest civil conflicts risk being reopened by Britain s new hard edged approach to national and European identities These key issues are teased out in the 41 chapters of this book making this the most comprehensive volume on Irish politics to date

Transnational Migration, Gender and Rights Ragnhild Sollund,2012-02-03 This book examines the vulnerability

caused by migration in particular the vulnerability of women that may cause forced migration and the ways in which this is dealt with by national authorities in affluent European states It explores transnational migration gender and human rights migration regimes and anti trafficking efforts in Norway

Structural Transformation and Economic Development Banji Oyelaran-Oyeyinka,Kaushalesh Lal,2016-09-13 This book examines long term structural changes and the broad impact on economic development in regional comparative perspectives The book analyzes data across Africa Asia and Latin America It looks at key variables of productivity growth industrialization poverty urbanization and employment This book is concerned with understanding structural change dynamics and how it affects job creation living standards and the efficiency of

productive cities through manufacturing productivity growth that benefits majority of citizens With empirical evidence from a selected number of developing countries including China India Brazil Nigeria and South Africa the book attempts to present the considerable structural changes of these countries over the last few decades It highlights that growth without the expected job creation is one of the distinct features of growth in emerging and developing countries It suggests that countries may well record economic growth whether through within sector productivity increase or through structural change but this may not necessarily lead to employment an important concern for long term development **The Fire**

Below Robert Bruce Ware,2013-05-13 This groundbreaking work examines the complex dynamics of Russia s relations with the Caucasus revealing the profound effects that Caucasian forces have had upon Russia s development Essays show how Georgian sparks ignited conflagrations in South Ossetia 1991 1992 and Abkhazia 1992 1993 spreading northward to conflicts in Ossetia and Ingushetia 1992 and Chechnya 1994 1996 Combined with jihadist influences that entered from the South and East by way of Dagestan these events culminated in the second Russo Chechen war 1999 2009 Chechnya transformed both the Russian military and the presidency of Vladimir Putin Beginning in 2000 Putin s Chechenization strategy had unforeseen and controversial results for the entire Russian Federation These ironies are elucidated in case studies of the Stavropol region the Sochi Olympics the Pussy Riot conviction and Russia s efforts to reintegrate religion with politics against the backdrop of an emerging Islamic inner abroad Neither Russia nor the Caucasus can be understood without an appreciation of their uneasy interconnection and its explosive consequences
