Exclusion and Inclusion in International Migration: Power, Resistance and Identity Armağan Teke Lloyd, 2019-04-30 People on the move face new barriers in a globalizing world Some of these barriers are related with the rise of an increasingly security oriented approach towards international migrants Notwithstanding the forces of globalization states have maintained their monopoly power over whom to admit and whom to deny within their borders In other words they remain the sovereign authority regulating the entry and exit of people However in recent years a number of states have singled out international immigration as the greatest political and social threat to their cultural and national security The securitization of immigration is founded upon the premise that the international movement of people represents an exceptional risk for the survival of the nation and this is often associated with terrorism instability and criminality The securitization of immigration is also based on the idea that the traditional authority vested in states to regulate immigration is somehow insufficient and needs to be enhanced These assumptions correspond with a real policy shift in some countries such as the United States where the government is planning to spend approximately 23 Billion Dollars on border security and

Post-Soviet Power Susanne A. Wengle,2015-02-05 Post Soviet Power tells the story of the Russian electricity system and examines the politics of its transformation from a ministry to a market Susanne A Wengle shifts our focus away from what has been at the center of post Soviet political economy corruption and the lack of structural reforms to draw attention to political struggles to establish a state with the ability to govern the economy She highlights the importance of hands on economic planning by authorities post Soviet developmentalism and details the market mechanisms that have been created This book argues that these observations urge us to think of economies and political authority as mutually constitutive in Russia and beyond Whereas political science often thinks of market arrangements resulting from political institutions Russia s marketization demonstrates that political status is also produced by the market arrangements that actors create Taking this reflexivity seriously suggests a view of economies and markets as constructed and contingent entities

The Life of Permafrost Pey-Yi Chu,2020-12-07 In the Anthropocene the thawing of frozen earth due to global warming has drawn worldwide attention to permafrost Contemporary scientists define permafrost as ground that maintains a negative temperature for at least two years But where did this particular conception of permafrost originate and what alternatives existed The Life of Permafrost provides an intellectual history of permafrost placing the phenomenon squarely in the political social and material context of Russian and Soviet science Pey Yi Chu shows that understandings of frozen earth were shaped by two key experiences in the Russian Empire and the Soviet Union On one hand the colonization and industrialization of Siberia nourished an engineering perspective on frozen earth that viewed the phenomenon as an aggregate physical structure ground On the other a Russian and Soviet tradition of systems thinking encouraged approaching frozen earth as a process condition and space tied to planetary exchanges of energy and matter Aided by the US militarization of the Arctic during the Cold War the engineering view of frozen earth as an obstacle to construction became dominant The Life of Permafrost tells the fascinating story of how permafrost came to acquire life as Russian and Soviet scientists studied named and defined it

Earned Citizenship Michael J. Sullivan, 2019-03-19 The migration and settlement of 11 million unauthorized immigrants is among the leading political challenges facing the United States today The majority of unauthorized immigrants in the U S have been here for more than five years and are settling into American communities working forming families and serving in the military even though they may be detained and deported if they are discovered An open question remains as to what to do about unauthorized immigrants who are already living in the United States On one hand it is important that the government sends a message that future violations of immigration law will not be tolerated On the other sits a deeper ethical dilemma that is the focus of this book what do the state and citizens owe to unauthorized immigrants who have served their adopted country Earned Citizenship argues that long term unauthorized immigrant residents should be able to earn legalization and a pathway to citizenship through service in their adopted communities Their service would act as restitution for immigration law violations Military service in particular would merit naturalization in countries with a strong citizen soldier tradition including the United States The book also considers the civic value of caregiving as a service to citizens and the country contending that family immigration policies should be expanded to recognize the importance of caregiving duties for dependents This argument is part of a broader project in political theory and public policy aimed at reconciling civic republicanism with a feminist ethic of care and its emphasis on dependency work As a whole Earned Citizenship provides a non humanitarian justification for legalizing unauthorized immigrants based on their contributions to citizens and institutions in their adopted nation

Conflict Areas in the Balkans Pinar Yürür, Arda Özkan, 2020-10-27 The situation in the Balkans such as the solution to the status of Kosovo is currently the largest international political problem in Europe with the potential to burst into a world crisis regarding the Eastern Western relations On the other hand a successful solution to the problem in the Balkans could serve as a model for solving the Muslim Christian tensions elsewhere in the world It is the intention of this book to contribute proposals for solutions to the problems of Balkans The starting principle for the solutions to be effective is that they should come in a natural way from the people

below and should not be enforced by the political elites from above Based on self determination of nations as a starting principle they should encourage intra regional cooperation among the regional entities economic cultural sport as a basis for political social understanding and cooperation secondly accelerate their economic political and social development and thirdly as a final step enable the inclusion of the Balkan countries into the European Union
