Revealing Arithmetic Katherine Hannon, 2021-04-12 For years Christian math books have looked basically like secular textbooks with the addition of a Bible verse here or there Here at last is a book to help you transform your math class and show your child God's handiwork in math Revealing Arithmetic will help you Teach math from a biblical worldview Worship the Lord in math Help your child really understand concepts Train your child to think mathematically Transform everyday activities and objects into math lessons Teach your child to use math as a real life tool Explore historical methods and symbols This book is designed for homeschool parents needing a simple math guide to use alongside their curriculum and help them teach arithmetic to elementary students older students needing a review of math basics before moving on to advanced mathematics or Christian school or co op teachers or future teachers wanting ideas on how to modify the curriculum to better reveal the truth of a Creator God

Mathematics for Tomorrow's Young Children C.S. Mansfield, N.A. Pateman, N. Bednarz, 2013-03-09 Social constructivism is just one view of learning that places emphasis on the social aspects of learning Other theoretical positions such as activity theory also emphasise the importance of social interactions Along with social constructivism Vygotsky's writings on children's learning have recently also undergone close scrutiny and researchers are attempting a synthesis of aspects of Vygotskian theory and social constructivism This re examination of Vygotsky's work is taking place in many other subject fields besides mathematics such as language learning by young children It is interesting to speculate why Vygotsky's writings have appealed to so many researchers in different cultures and decades later than his own times Given the recent increased emphasis on the social nature of learning and on the interactions between student teacher and context factors a finer grained analysis of the nature of different theories of learning now seems to be critical and it was considered that different views of students learning of mathematics needed to be acknowledged in the discussions of the Working Group
