microbes for life processes while remaining subject to the destructive capacities of others in diseases not yet conquered
Microbes can be marshaled to aid in solving many important global problems including food shortages resource recovery and
reuse energy shortages and pollution Microbiology is particularly suited to make important contributions to human needs in
developing countries yet it has received comparatively little attention The range of possible applications covers uses by
individuals and industries in rural settings villages and cities This book covers examples of microbial processes that may be
useful in developing countries Although many of these processes may not have a direct and immediate use their scope and
diversity should serve to indicate the strong potential for microbial applications **The Autocar**, 1988-06
