Enhancing Sustainability Through Non-Financial Reporting Monteiro, Albertina, Borges, Ana Pinto, Vieira, Elvira, 2023-10-16. The lack of transparency and accountability in organizations has made it difficult to identify, measure and disclose their sustainable practices and impacts, creating a challenge for global sustainability efforts. Furthermore, there is a lack of consensus on the determinants and impacts of non-financial information reporting. In response to these challenges, *Enhancing Sustainability Through Non-Financial Reporting*, a book edited by Albertina Monteiro, Ana Pinto, Borges and Elvira Vieira, offers a comprehensive analysis of the relationship between sustainability practices and reporting and the accounting, finance and management fields. This book provides a platform for both academics and practitioners to share their empirical and theoretical research on the contributions of organizations to sustainable development, the determinants and impacts of non-financial information reporting, the role of sustainability reporting standards and the challenges faced by accounting, finance, management and auditing. It is an essential resource for anyone seeking to enhance sustainability through non-financial reporting and is relevant to a wide range of audiences, including academics, practitioners and other interested individuals and groups.

Young Sun, Early Earth and the Origins of Life Muriel Gargaud, Hervé Martin, Purificación López-García, Thierry Montmerle, Robert Pascal, 2013-01-11. How did the Sun come into existence? How was the Earth formed? How long has Earth been the way it is now, with its combination of oceans and continents? How do you define life? How did the first life forms emerge? What conditions made it possible for living things to evolve? All these questions are answered in this colourful textbook addressing undergraduate students in Origins of Life courses and the scientifically interested public. The authors take the reader on an amazing voyage through time, beginning five thousand million years ago in a cloud of interstellar dust and ending five hundred million years ago when the living world that we see today was finally formed. A chapter on exoplanets provides an overview of the search for planets outside the solar system, especially for habitable ones. The appendix closes the book with a glossary, a bibliography of further readings and a summary of the Origins of the Earth and life in fourteen boxes.

Civic Continuities in an Age of Revolutionary Change, c.1750-1850 Judith Pollmann, Henk te Velde, 2023-01-05 This open access book explores the role of continuity in political processes and practices during the Age of Revolutions It argues that the changes that took place in the years around 1800 were enabled by different types of continuities across Europe and in the Americas With historians of modernity tending to emphasise the rise of the new scholarship has leaned towards an assumption that existing modes of action thought and practice simply became extinct irrelevant or at least subordinate to new modes In contrast this collection examines continuities between early modern and modern political cultures and organization in Europe and the Americas Shifting the focus from political modernization the authors examine the continued relevance of older often local practices in post revolutionary politics By doing so they aim to highlight the role of local political traditions and practices in forging and enabling political change The book argues that while political change was in fact at the centre of both the old and new polities that emerged in the Age of Revolutions it coexisted with and was indeed enabled by continuities at other levels
