RL.6.10, "By the end of the year read and comprehend literature, including stories, dramas, and poems, in the grades 6–8 text complexity band proficiently, with scaffolding as needed at the high end of the range."
Learning Targets/Objectives What should the students know or be able to do after the instruction? Use a sentence format with a measurable verb that matches the cognitive domain standard. This should be a small piece of the standard stated in measurable terms.	#1LT: I can reread a sentence that my parents or guardian just read by reading with the same fluency. #1 LO: Student can read at grade level fluency #2 LT: I can read my favorite book over and over again #2 LO: student can read at grade level fluency
Grouping Describe how and why students will be divided into groups, if applicable (homogeneous, heterogeneous, random / based on ability, interest, varied purposes, etc.)	#1: Student works with a parent #2: Student works independently
Differentiation If either or both lessons are whole class, how in the lesson(s) differentiated for the focal student?	Since students struggle with both phrasing and expression/volume they can have an extended amount of time to work since their striving fluency ability stems from needing to decode as they read.

This book highlights the essential relationship between lesson planning and key mathematical elements such as mastery and reasoning. The exemplification of ideas through useful classroom strategies gives the book a practical basis as well as theoretical. I have no doubt that even experienced teachers will find this book enlightening and encourage them to re-evaluate elements of their practice.

Hayley Hands, Secondary PGCE Mathematics Lead, Newcastle University, UK

Developing Maths Lesson Planning and Frameworks provides much food for thought and includes many immediate take-aways to reflect on or try out. This book will help enhance any maths teacher's lesson planning from the trainee teacher to the experienced practitioner.

Rose Marie Rochester, Archimedes NE Maths Hub Lead, BHCET Director of Maths, UK

Addressing the maths skills gap Wang et al propose a new method for maths lesson planning that harnesses the power of reasoning in mathematics teaching. Using a pedagogical approach called the Causal Connectivity Framework (CCF), this book helps teachers to support students in actively discovering the logical foundations upon which classroom activities are linked together. The authors have diverse expertise and experiences as maths teachers, teacher educators, and researchers, and this alternative approach is the result of long-term collaboration aimed at building up successful maths lessons from the very first steps of lesson planning.

Developing Maths Lesson Planning and Frameworks Offers practical advice within a theoretical framework. Ties in with UK National Curriculum requirements. Contains detailed practical examples and visual aids throughout. Reasoning is a critical component of maths learning, making this essential reading for maths teachers and teacher trainees as they help students to achieve maths mastery.

Linda Wang is Assistant Professor and PGCE secondary maths Lead at Durham University, UK. She is particularly interested in curriculum design at both secondary and lower primary level mathematics and developing the educational impact partnership model to deliver Continuing Professional Development (CPD) to future orientate Mathematics education.

Chris Brown is Professor of Education at the University of Southampton, UK. His research interests include using Professional Learning Networks (PLNs) to promote the collaborative learning of teachers as well as how research evidence can and should but often doesn't aid the development of education policy and practice.

Jeremy Dawson is Area Coordinator for the Advanced Maths Support Programme at Durham University, UK. He has worked in a variety of diverse school settings around North East England and has extensive experience of teaching mathematics from KS2 to KS5, as well as contributing and assisting on gifted and talented programs for prospective university entrants.

Teaching Elementary Mathematics to Struggling Learners Bradley S. Witzel, Mary E. Little, 2016-01-24
