

History Grade 8 Term 4 Summary

Reasons why World War I broke out

manufacturing – making products from raw materials

rivals – enemies

Kaiser – the word for a king in Germany

Unit 1: Overview of long-term causes: Nationalism, industrial economies, control of seas, colonisation and empires

- There were four main long-term causes which led to the outbreak of World War I in 1914.
- These causes included nationalism, the growth of industrial economies, and control of seas, European colonisation and the growth of European empires.
- Nationalism
- By the end of the 19th century, European countries were competing to be the richest, most powerful and strongest European nation.
- This pride and devotion to one's country is called nationalism.
- Industrial economies
- Britain was the first country to become industrialised in the 19th century
- But Germany had begun to catch up and was producing iron, steel, coal and cars.
- By the beginning of the 20th century, Britain no longer had the economic lead in Europe.
- Control of the seas
- Tension had been building up in Europe for many years.
- The main enemies or rivals were Britain and Germany.
- To build and keep a big empire, Britain and Germany had to have powerful navies.
- Britain had the strongest navy in the world.
- It used the navy to protect its coastline, its large overseas empire and its trade routes across the world.
- To challenge British control of the seas, the German Kaiser said he was going to build a great navy that could rival the British navy.
- In response to this, Britain made a formidable new warship called a Dreadnought, which radically changed and improved their power at sea.
- The Dreadnought had an armoured deck, with fast-firing, heavy guns.
- Germany responded by trying to build even more superior warships.
- This was the beginning of the 'naval race,' in which both sides tried to build better and bigger warships.

Gradehistory Scope For Final Term

Gradehistory Scope For Final Term:

A Handbook for History Teachers James A. Duthie, 2012-09-28 History is not a mere chronicle of facts but a dialogue between competing interpretations of the past it should be taught as such Teaching history in this way makes it both intellectually demanding and more interesting while at the same time helps students acquire the knowledge and skills necessary to become functioning citizens in a democracy The opening chapters provide the rationale for the study of history its epistemological basis and the logic of the discipline The bulk of the book deals with practical ways to help students acquire process and apply information In particular it addresses the specific thinking skills required by the discipline with many effective techniques for helping students to master them The implications of this approach for teacher evaluation of student work are also addressed

Victorian Narratives of the Recent Past Helen Kingstone, 2017-03-30 This book explains why narrating the recent past is always challenging and shows how it was particularly fraught in the nineteenth century The legacy of Romantic historicism the professionalization of the historical discipline and even the growth of social history all heightened the stakes This book brings together Victorian histories and novels to show how these parallel genres responded to the challenges of contemporary history writing in divergent ways Many historians shrank from engaging with controversial recent events This study showcases the work of those rare historians who defied convention including the polymath Harriet Martineau English nationalist J R Green and liberal enthusiast Spencer Walpole A striking number of popular Victorian novels are retrospective This book argues that Charlotte Bront Elizabeth Gaskell and George Eliot s novels of the recent past are long overdue recognition as genuinely historical novels By focusing on provincial communities these novelists reveal undercurrents invisible to national narratives and intervene in debates about women s contribution to history

History Class Revisited Jody Passanisi, 2016-04-28 Learn new approaches to teaching history in middle school so students are more engaged in the big ideas and eager to examine the world around them Co published by Routledge and MiddleWeb this practical guide will help you consider the unique needs of middle schoolers who are in the midst of many social and emotional changes and need to see why the study of history matters to their own lives Author Jody Passanisi shares helpful strategies and activities to make your social studies class a place where students can relate to the material connect past history to present events collaborate with others think critically about important issues and take ownership of their learning Topics include Reading and analyzing primary and secondary sources for deeper comprehension of historical issues Developing a written argument and defending it with supporting details and cited sources Examining the social context of a historical event and tracing the historical underpinnings of present day issues Using field trips games and Project Based Learning to make learning history a fun and interactive experience Assessing your students progress using self reflection projects essays and presentations The appendices offer resources for each of the topics covered in the book as well as reproducible Blackline Masters of the charts and diagrams which can be photocopied or downloaded from our website

The New Era, 1927
The Oxford World History of Empire Peter Fibiger Bang, C. A. Bayly, Walter Scheidel, 2020-12-02 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume Two The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present Case studies deal with the full range of the historical experience of empire from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay and from ancient Rome and China to the Mughals American settler colonialism and the Soviet Union Forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases
