Geometry Mary Lee Vivian, 1994 Research on Mathematics Textbooks and Teachers' Resources Lianghuo Fan, Luc Trouche, Chunxia Qi, Sebastian Rezat, Jana Visnovska, 2018-02-13 This book focuses on issues related to mathematics teaching and learning resources including mathematics textbooks teacher guides student learning and assessment materials and online resources The book highlights various theoretical and methodological approaches used to study teaching and learning resources and addresses the areas of resources teachers and students at an international level As for the resources the book examines the role textbooks and other curricular or learning resources play in mathematics teaching learning and assessment It asks questions such as Could we consider different types of textbooks and roles they play in teaching and learning How does the digitalization of information and communication affect these roles What are defining features of e textbooks and how could we characterize the differences between the traditional textbooks and e textbooks As for the teachers the book discusses the relationships between teachers individual and collective resources and the way in which we could model such relationships Specific questions addressed are What is the role of teachers in developing textbooks and other teaching and learning materials What are the relationships between resource designers and users What are the consequences of these changing roles and relationships for the teaching of mathematics and for teacher knowledge and professional development As for the students the book explores how students as well as their teachers interact through resources It raises and addresses questions such as What are the effects of modern ICT particularly internet on students use and the design of resources How do changing patterns of use and design affect student behaviour learning and relationships to the subject of mathematics

Revisiting Mathematics Education Hans Freudenthal, 2005-12-08 This book is a product of love and respect If that sounds rather odd I initially apologise but let me explain why I use those words The original manuscript was of course Freudenthal's but his colleagues have carried the project through to its conclusion with love for the man and his ideas and with a respect developed over years of communal effort Their invitation to me to write this Preface enables me to pay my respects to the great man although I am probably incurring his wrath for writing a Preface for his book without his permission I just hope he understands the feelings of all colleagues engaged in this particular project Hans Freudenthal died on October 13th 1990 when this book project was well in hand In fact he wrote to me in April 1988 saying I am thinking about a new book I have got the sub title China Lectures though I still lack a title I was astonished He had retired in 1975 but of course he kept working Then in 1985 we had been helping him celebrate his 80th birthday and although I said in an Editorial Statement in *Educational Studies in Mathematics* ESM at the time we look forward to him
