process and practice of entrepreneurship and innovation in the development implementation and application of information technology worldwide as well as providing academics entrepreneurs managers and practitioners with up to date comprehensive and rigorous research based articles on the formation and implementation of effective strategies and business plans Essentials of Business Research Jonathan Wilson,2010-05-05 Essentials of Business Research A Guide to Doing Your Research Project is a concise accessible student case orientated text that also considers the importance of the supervisor in the dissertation process This book aims to guide the student through the entire research process by using actual student case examples and explaining the role of the supervisor and how to meet their expectations Vulnerability of Agriculture, Water and Fisheries to Climate Change Mohamed Behnassi,Margaret Syomiti Muteng'e,Gopichandran Ramachandran,Kirit N. Shelat,2014-07-15 Human activity is changing the global environment at an unprecedented rate while humanity faces a range of complex and interrelated challenges to local regional and global development human security and politics Food security ranks high on the science policy and development agendas However most research linking global change and food systems examines the impact of climate change on agricultural production or the impact of agriculture on land use pollution and biodiversity overlooking interactions with other aspects of the food system such as food processing packaging transportation and consumption and employment derived from these activities This book demonstrates that new threats to food security which arise from environmental change require more than simply a focus on agricultural practices what is needed is an integrated food system approach The authors point out that the process of adapting food systems to global environmental change is not simply a search for technological solutions to increase agricultural yields Tradeoffs across multiple scales among food system outcomes are a prevalent feature of globalized food systems Within food systems there are key underexplored areas that are both sensitive to environmental change and crucial to understanding its implications for food security and adaptation strategies The authors assert that technical prescriptions alone will not efficiently manage the food security challenge This book is their contribution to a new paradigm which addresses food systems holistically by engaging researchers in multiple disciplines to understand the causes and drivers of vulnerability **Lean Management Beyond Manufacturing** Sanjay Bhasin,2015-04-20 Exploring Lean manufacturing in a holistic manner this book helps organizations to implement Lean principles successfully by offering theoretical empirical and practical knowledge It empirically demonstrates how a successful Lean initiative can improve organizational efficiency and incorporates valuable primary research to substantiate findings It argues that Lean principles need to be applied throughout the value chain in order to be successful and suggests that these tools need to be aligned with culture and change management Chapters examine issues including Lean cultures impediments to Lean Lean and performance measurement and the impact of Lean Viewing Lean as a never ending journey this book provides a valuable resource to practising Lean managers and specialist researchers and students and also offers an important reference for organizations embarking on their Lean voyage **The**

The implications of best practice event management when applied to small-scale local events Sven Damm, 2010-05-27 Inhaltsangabe Abstract Event management is a ubiquitous word in modern society The word is used for small business breakfasts large corporate shows and also for big international sport events such as the Olympic Games We all have an idea of what management is but what is an event An event is often described as something that happens and therefore in that sense we could use the term event management to describe the organisation of everything that happens Getz defines an event as an occurrence at a given place a special set of circumstances a noteworthy occurrence and this definition embraces a wide range of possibilities with one important thing in common they can only occur once As such one key characteristic of events is that they are not continuous for they each have a beginning and an end and every event is different from the last one No matter how hard one tries it is literally impossible to replicate an event thus when watching the Olympic Games we do not see the same picture repeating itself every four years for the event changes and evolves over time Consequently to fully understand how things happen within any given event it is necessary to get involved in the planning and execution of an event Malhotra writes that events are an important aspect of human life and that our understanding of them is poorly developed He thinks that there is a need to enhance the understanding of the subject and this opinion is supported by the relative youth of academic study into the topic In their book Festival Special Event Management Allen O Toole Harris and McDonnell 2008 date the birth of the industry to the 1980s where several seminal events set the pattern for the contemporary event industry as we know it today Thus especially compared with other disciplines in the field of social science event management is a young discipline and there is not yet a huge base of research to work with In addition rather than academically rigorous research conducted by professional researchers much of the knowledge in the field has been generated by practising event managers who have written books about their own experiences knowledge and skills It is of no surprise that these practitioners and the events they discuss tend to reflect the

planning of the biggest events the earth has seen such as the Olympic Games and US presidential inaugurations These authors possess a great deal of experience and
