Fig. 1—Standard Programmable Thermostat

1. **To Select the Mode:**
Use the MODE button to move between the choices. OFF, HEAT, COOL, or EMERGENCY will appear on the display. EMERGENCY will only appear on heat pump models.
2. **To Select the Fan Operation:**
Use the FAN button to move between continuous fan (indicated by the FAN ON icon) and auto fan operation.
3. **To Read the Room Temperature:**
The large display reads room temperature until a button is pressed.
4. **To Adjust the Set Point:**
The first press of the UP or DOWN button does not change the set point. It displays the current set point for a period of 5 seconds. Successive presses within this 5 seconds will adjust the set point and restart the 5 seconds. During the 5 seconds, the SET TEMP icon will be flashing.

PROGRAMMED OPERATION

Introduction

The Standard Programmable Thermostat provides four periods per day (MORNING, DAY, EVE, NIGHT) and two schedules per week (MtuWThFr and SatSu). A separate time, heat set point, and cool set point can be set for each period and schedule. Before starting to actually program the thermostat, fill out Table 1 with the values you wish to program. (The Energy Star, U.S. Department of Energy recommended time and temperature values are already programmed for you as a starting point and are shown on the left side of the table.)

The first press of the PROGRAM button brings up the programming mode and places you at the current day and period. Successive presses move you between the four daily periods.

WHILE PROGRAMING:

The TIME/TEMP button moves between selections of SET TIME, SET TEMP and HEAT, and SET TEMP and COOL. These three numbers are to be programmed for each of the periods MORNING, DAY, EVE, and NIGHT.
