Discrete Optimization I ,2000-04-01 Discrete Optimization I **Integer Programming** ,2005 *Production Planning by Mixed Integer Programming* Yves Pochet, Laurence A. Wolsey, 2006-04-19 This textbook provides a comprehensive modeling reformulation and optimization approach for solving production planning and supply chain planning problems covering topics from a basic introduction to planning systems mixed integer programming MIP models and algorithms through the advanced description of mathematical results in polyhedral combinatorics required to solve these problems Based on twenty years worth of research in which the authors have played a significant role the book addresses real life industrial production planning problems involving complex production structures with multiple production stages using MIP modeling and reformulation approach The book provides an introduction to MIP modeling and to planning systems a unique collection of reformulation results and an easy to use problem solving library This approach is demonstrated through a series of real life case studies exercises and detailed illustrations Review by Jakub Marecek Computer Journal The emphasis put on mixed integer rounding and mixing sets heuristics in built in general purpose integer programming solvers as well as on decompositions and heuristics using integer programming should be praised There is no doubt that this volume offers the present best introduction to integer programming formulations of lotsizing problems encountered in production planning 2007 Operations Research, Computing, and Homeland Defense R. Kevin Wood, Robert F. Dell, 2011 This book is published in conjunction with the 12th Computing Society Conference held January 9 2011 in Monterey California The themes of the conference and this book are operations research computing and homeland defense The papers cover topics on the theory of computing mathematical programming game theory statistics and more over half have applications to homeland defense

50 Years of Integer Programming 1958-2008 Michael Jünger, Thomas M. Liebling, Denis Naddef, George L. Nemhauser, William R. Pulleyblank, Gerhard Reinelt, Giovanni Rinaldi, Laurence A. Wolsey, 2009-11-06 In 1958 Ralph E Gomory transformed the field of integer programming when he published a paper that described a cutting plane algorithm for pure integer programs and announced that the method could be refined to give a finite algorithm for integer programming In 2008 to commemorate the anniversary of this seminal paper a special workshop celebrating fifty years of integer programming was held in Aussois France as part of the 12th Combinatorial Optimization Workshop It contains reprints of key historical articles and written versions of survey lectures on six of the hottest topics in the field by distinguished members of the integer programming community Useful for anyone in mathematics computer science and operations research this book exposes mathematical optimization specifically integer programming and combinatorial optimization to a broad audience **E-Business** Robert M.X.
