Relationship Management CRM Business Intelligence BI and Big Data analytics BDA are business related tasks and

processes which are supported by standardized software solutions The book explains that this requires business oriented

thinking and acting from IT specialists and data scientists It is a good idea to let students experience this directly from the

business perspective for example as executives of a virtual company in a role playing game The second edition of the book

has been completely revised restructured and supplemented with actual topics such as blockchains in supply chains and the

correlation between Big Data analytics artificial intelligence and machine learning The structure of the book is based on the

gradual implementation and integration of the respective information systems from the business and management

perspectives Part I contains chapters with detailed descriptions of the topics supplemented by online tests and exercises Part

II introduces role play and the online gaming and simulation environment Supplementary teaching material presentations

templates and video clips are available online in the gaming area The gaming and business simulation Kdibisglobal.com
