Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorizations sweeping the Asia Pacific region today. Jeffrey Alexander brings a wealth of information to light providing English translations of transcripts, industry publications and company histories that have until now been available only in Japanese. By exploring the industry as a whole he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters and brutal competition.

Classic Japanese Motorcycles Ron Burton, 2000. As the costs associated with buying and owning collectible American and European motorcycles continue to rise, enthusiasts are turning in greater numbers to motorcycles produced by Japanese manufacturers from the 1960s to the early 1980s. The prolific production of Japanese motorcycles during this period today translates to consumer friendly market values for collectors. This buyer's guide divides the world of classic Japanese motorcycles by the four major manufacturers: Honda, Kawasaki, Yamaha, and Suzuki, while emphasizing such landmark models as the Kawasaki Z1 and Honda CB750, and featuring a chapter of less common models from secondary marques like Bridgestone. Photographs of the motorcycles are accompanied by complete descriptions of specification, components, paint codes and serial numbers. A five star rating system grades the bikes on collectibility, parts availability, two up touring, reliability and power, while the author highlights common repair and restoration needs and suggests sources for collectible models.
