Republic Patrick Luiz Sullivan De Oliveira, 2025-06-10 Why and how the French made the balloon into one of the quintessential symbols of late nineteenth century modernity and how the balloon s reinvention shaped the airplane s assimilation in the early years of aviation On August 27 1783 a large crowd gathered in Paris to watch the first ascent of a hydrogen balloon Despite the initial feverish enthusiasm by the mid nineteenth century the balloon remained relatively unchanged and was no longer seen as the harbinger of a new era Yet that all changed in the last third of the century when following the traumatic Franco Prussian War defeat the balloon reemerged to become the modern artifact that captured the attention of many Through this process the balloon became an important symbol of the fledgling Third Republic and France established itself as the world leader in flight In *Ascending Republic* Patrick Luiz Sullivan De Oliveira tells for the first time the story of this surprising revival Through extensive research in the press and archives in France the United States and Brazil De Oliveira argues that French civil society cultivated popular enthusiasm for flight what historians call airmindedness decades before the advent of the airplane Champions of French ballooning made the case that if the British Royal Navy controlled the seas and the Imperial German Army dominated the continent then France needed to take ownership of the skies The French appropriated this newly imagined geopolitical space through a variety of practices from republican savants who studied the atmosphere at high altitudes to aristocrats who organized transcontinental long distance competitions All of this made Paris into the global capital of a thriving aeronautical culture that incorporated seemingly contradictory visions of sacrificial patriotism aristocratic modernity colonial anxiety and technological cosmopolitanism *How That Robot Made Me Feel* Ericka Johnson, 2025-05-20 An edited collection that explores what emotions we have when encountering robots how we react emotionally to them in different contexts and why these emotional responses are so important Do robots or the AI that is driving them have emotions That is a hotly debated topic both in science fiction where such assertions are a staple of the narrative and in tech development where it often makes headlines But what about how we humans emotionally respond

to robots Are our emotional responses any less important when it comes to how the robots we encounter today are designed In How That Robot Made Me Feel Ericka Johnson asks the authors in this collection to critically examine our emotional and affective responses to robots and what such an examination would do to the way roboticists use or toy with our emotions in their design decisions The narrative arc of this anthology follows the question of just whose emotions are being engaged through robotic interactions why and for what design ends Of course the answer is that it is our emotions that are interesting And these emotions are not universal despite the historically universalist paradigm of AI and how robotic emotions work Emotions are contingent to borrow a commonly used phrase in feminist technoscience They are placed in space time and cultural context And understanding how they are produced and engaged with will help clarify many of the political aspects of robotic interaction that are currently concealed by the shiny and allegedly neutral surfaces of robots **Study Guide for**
