The Royal Flying Corps, the Western Front and the Control of the Air, 1914-1918 James Pugh, 2017-05-12 By the middle of 1918 the British Army had successfully mastered the concept of all arms warfare on the Western Front This doctrine integrating infantry artillery armoured vehicles and crucially air power was to prove highly effective and formed the basis of major military operations for the next hundred years Yet whilst much has been written on the utilisation of ground forces the air element still tends to be studied in isolation from the army as a whole In order to move beyond the usual aircraft and aces approach this book explores the conceptual origins of the control of the

air and the role of the Royal Flying Corps RFC within the British army In so doing it addresses four key themes First it explores and defines the most fundamental air power concept the control of the air by examining its conceptual origins before and during the First World War Second it moves beyond the popular history of air power during the First World War to reveal the complexity of the topic Third it reintegrates the study of air power during the First World War specifically that of the RFC into the strategic operational organisational and intellectual contexts of the era as well as embedding the study within the respective scholarly literatures of these contexts Fourth the book reinvigorates an entrenched historiography by challenging the usually critical interpretation of the RFC's approach to the control of the air providing new perspectives on air power during the First World War This includes an exploration of the creation of the RAF and its impact on the development of air power concepts
