Collateral Damage Sharon L. Nichols, David C. Berliner, 2007-03-01 Drawing on their extensive research Nichols and Berliner document and categorize the ways that high stakes testing threatens the purposes and ideals of the American education system For more than a decade the debate over high stakes testing has dominated the field of education This passionate and provocative book provides a fresh perspective on the issue and powerful ammunition for opponents of high stakes tests Their analysis is grounded in the application of Campbell's Law which posits that the greater the social consequences associated with a quantitative indicator such as test scores the more likely it is that the indicator itself will become corrupted and the more likely it is that the use of the indicator will corrupt the social processes it was intended to monitor Nichols and Berliner illustrate both aspects of this corruption showing how the pressures of high stakes testing erode the validity of test scores and distort the integrity of the education system Their analysis provides a coherent and comprehensive intellectual framework for the wide ranging arguments against high stakes testing while putting a compelling human face on the data marshalled in support of those arguments

Fostering Change in Institutions, Environments, and People David C. Berliner, Haggai Kupermintz, 2014-04-08 This volume is comprised of contributions from leading scholars in education and psychology In part one of the book the authors provide insight into the psychology of change examining What factors work as catalysts for change in environments institutions and people What factors hinder change When change is deemed beneficial In the second part of this volume the authors turn their attention to the issue of peace education They examine the types of problems that societies and scholars should identify and try to solve in hopes of building more peaceful environments The final chapter is a biography honoring Professor Gavriel Gabi Salomon a significant contributor to the vast literature on change This book is appropriate reading for professors students and academics who are dedicated to fostering change to benefit institutions environments and people
