End Of Life Care In Neurological Disease:

Palliative Care in Neurological Disease Judi Byrne, 2009 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life ethically practically and clinically challenging However only in recent years has serious attention been paid to palliative care approaches for people affected by conditions other than cancer This unique and comprehensive book builds bridges between palliative and neurological care expertise recognising that such people may require intensive input from rehabilitation and therapy teams at the same time as complex symptom management and supportive non clinical care Its comprehensive guidance on managing these complex conditions aims to enable those living with them to enjoy the best quality of life for as long as possible

End of Life Care in Neurological Disease David Oliver, 2012-11-27 As end of life care is extended to more and more people it is increasingly important that people with progressive neurological disease are recognised as having particular issues as their disease progresses This group of people with advancing motor neurone disease multiple sclerosis Parkinson s disease multiple systems atrophy progressive supranuclear palsy Huntington s disease and other progressive neurological disease face increasing problems with physical symptoms and psychosocial and spiritual issues for both themselves and their families and carers This book encourages health and social care professionals to become closely involved in the care of these people and their families so that advance care plans can be started and quality of life maintained This book addresses the principles and practice of developing end of life care strategies for neurological disease written with a clinical multidisciplinary focus and illustrated with detailed case studies

Palliative Care in Neurology Raymond Voltz, Marianne de Visser, David Oliver, 2020-03-10 Over the last 50 years palliative care has usually been associated with cancer patients but more recently there has been increased discussion of the role of palliative care for neurological patients In the past years neurology has moved from being a purely diagnostic area to a very therapeutically active one A further step needs to be taken to modify the therapeutic activity from cure to care depending on the patient s disease trajectory Palliative care has been associated with care at the end of life whereas it may be appropriate earlier in the disease progression and will extend after death in the support of bereaved families The care of patients with neurological disease and their families will encompass the psychological spiritual and existential issues and neurologists and the teams in which they work should develop skills to consider all aspects of care in order to maximize the quality of life of all involved and enable patients to die peacefully

Palliative Care in Neurological Disease Judi Byrne, Penny McNamara, Jane Seymour, Pam McClinton, 2021-12-16 The particular needs of people with progressive long term neurological conditions including Parkinson s Disease Motor Neurone Disease MND Multiple Sclerosis MS and Huntington s disease may make care delivery and planning the last stages of life ethically practically and clinically challenging
