Math on Trial Leila Schneps, Coralie Colmez, 2013-03-12 In the wrong hands math can be deadly Even the simplest numbers can become powerful forces when manipulated by politicians or the media but in the case of the law your liberty and your life can depend on the right calculation In *Math on Trial* mathematicians Leila Schneps and Coralie Colmez describe ten trials spanning from the nineteenth century to today in which mathematical arguments were used and disastrously misused as evidence They tell the stories of Sally Clark who was accused of murdering her children by a doctor with a faulty sense of calculation of nineteenth century tycoon Hetty Green whose dispute over her aunt's will became a signal case in the forensic use of mathematics and of the case of Amanda Knox in which a judge's misunderstanding of probability led him to discount critical evidence which might have kept her in jail Offering a fresh angle on cases from the nineteenth century Dreyfus affair to the murder trial of Dutch nurse Lucia de Berk Schneps and Colmez show how the improper application of mathematical concepts can mean the difference between walking free and life in prison A colorful narrative of mathematical abuse *Math on Trial* blends courtroom drama history and math to show that legal expertise isn't always enough to prove a person innocent
