- ii. I chose this question because i lost all the marks for this question because i did not follow instructions.
- iii. Marker's comments "The question requires you to cite examples from the text."

i agree with the comments because without citing examples from the paragraph, my answer becomes general. In order to clearly show the marker that the question i was supposed to cite from the paragraph. However i think i should have been rewarded some marks for the effort i showed since the question did not explicitly specify.

and Medicine Division, Board on Population Health and Public Health Practice, Committee on Addressing Sickle Cell Disease: A Strategic Plan and Blueprint for Action, 2021-01-22 Sickle cell disease SCD is a genetic condition that affects approximately 100 000 people in the United States and millions more globally. Individuals with SCD endure the psychological and physiological toll of repetitive pain as well as side effects from the pain treatments they undergo. Some adults with SCD report reluctance to use health care services unless as a last resort due to the racism and discrimination they face in the health care system. Additionally, many aspects of SCD are inadequately studied, understood, and addressed. Addressing Sickle Cell Disease examines the epidemiology, health outcomes, genetic implications, and societal factors associated with SCD and sickle cell trait (SCT). This report explores the current guidelines and best practices for the care of patients with SCD and recommends priorities for programs, policies, and research. It also discusses limitations and opportunities for developing national SCD patient registries and surveillance systems, barriers in the healthcare sector associated with SCD and SCT, and the role of patient advocacy and community engagement groups.
