matters and measure it in multiple ways not just via standardized tests Right now we re lying to ourselves about whether our children are learning And the longer we accept that lie the more damage we do It s time to end our blind reliance on high stakes tests With The Testing Charade Daniel Koretz insists that we face the facts and change course and he gives us a blueprint for doing better

**Enacted Mathematics Curriculum** Denisse R Thompson,Zalman Usiskin,2014-01-01 This volume is an outgrowth of the Conference on Research on the Enacted Mathematics Curriculum funded by the National Science Foundation and held in Tampa Florida in November 2010 The volume has the potential to be useful to a range of researchers from established veterans in curriculum research to new researchers in this area of mathematics education The chapters can be used to generate conversation about researching the enacted mathematics curriculum including similarities and differences in the variables that can and should be studied across various curricula As such it might be used by a curriculum project team as it outlines a research agenda for curriculum or program evaluation It might also be used as a text in a university graduate course on curriculum research and design The chapters in this volume are a natural complement to those in Approaches to Studying the Enacted Mathematics Curriculum Heck Chval Weiss Ziebarth 2012 also published by Information Age Publishing While the present volume focuses on a range of issues related to researching the enacted mathematics curriculum including theoretical and conceptual issues the volume by Heck et al provides insights into different instrumentations used by groups of researchers to study curriculum enactment

*Thinking and Acting Systemically* Alan Daly,Kara Finnigan,2016-05-19 This volume argues that districts are important as a lever for change given the limited success of school by school efforts Policies that focus on skill development recognize and support performance create opportunities for collaboration build leader capacity and create networks of knowledge sharing hold great potential for improving districts but it will require a paradigm shift in the way we view our public school system and those who work within it away from blame and toward complex systems change

**Parents and Textbooks** Gerard Giordano,2019-03-26 Parents wondered exactly what was transpiring in classrooms Although they asked their children they did not have complete confidence in their responses When they quizzed teachers school administrators school board members and politicians they realized that they sometimes had conflicting interests They resolved to get the information they wanted on their own they would examine classroom textbooks This book recounts the common sense questions that parents posed about these materials

**Childhood and Nature** David Sobel,2025-03-15 Childhood and Nature is a guide for educators looking to foster in their students a love of nature as well as an understanding of complex environmental issues

This second edition brings new material and fresh insights to David Sobel's foundational exploration of place-based education. Sobel articulates seven design principles that teachers can use to build learning experiences: adventure, fantasy, and imagination; animal allies; maps and paths; special places; small worlds; and hunting and gathering. Pulling from recurrent play themes and real-world examples from educators, Sobel details place-based projects and lessons for each principle. Students learn and develop vital skills through engagement with their local environments and communities. Miniature ecosystems in the small world of a sandbox, for example, can help children grasp larger abstract ideas. A timely and actionable resource, *Childhood and Nature* shows how centering the world around us in education can create a generation of nature students, explorers, and protectors. Bunn, 2017-01-09 This book examines the idea of good education, which is thought to include a scientific and technical component, a mathematical component, a writing component, and an ethical and aesthetic component. Bunn proposes a new three-way intersection in these teachings: the basic sciences and mechanics of leveraging on a seesaw, the basic formulations of patterning an algebraic equation, and the basic rules for writing a sentence in English. In all three forms of inquiry, balance is the mainstay through which problems in US middle school education are brought together and analyzed.
