

ANALYSING AN ESSAY QUESTION

1. Introduction

Common criteria of undergraduate essay writing focus on the following requirements:

- students need to be analytical and critical in their response
- students need to structure their writing logically
- students need to be persuasive writers

students need to answer the question

This booklet looks at, how to **analyse your essay question**. Other Learning Centre booklets in this series deal with the other aspects:

- Analytical Writing deals with the difference between analytical and descriptive writing
- Planning and Structuring an Essay deals with logical structures
- Developing and Supporting an Argument deals with persuasion

Expectations of student assignments

One of the difficulties experienced by students, particularly in first year, is understanding what standard is expected in essays at tertiary level. As well as this, each subject discipline has its own ways of doing things and its own conventions about essay structure and writing style. For instance, in some subjects it is acceptable to write very personally and put forward your own opinions and feelings on a topic and in others such a personal response would not be appropriate. You need to find out the expectations and conventions of your subjects so that you can write essays that are valued within the context of your discipline. You may be lucky enough to have information and support provided by individual subject teachers e.g. model essays, assessment criteria sheets.

You can help yourself by

- reading Faculty handbooks, which will often give information about the disciplinary expectations. Some Faculties have provided special publications to help first year students with writing their essays.
- reading in the subject as much as possible, which will help you understand the technical language and the style conventions of the particular subject area.

Aims and Objectives

This booklet will help you develop useful strategies for analysing essay questions. In particular, it aims

- to explore the functions of different sections of the question
- to analyse the instructions of the question
- to look at the relationship between instructions and structure of a response
