**EU Law, Fundamental Rights and National Democracy** Eduardo Gill-Pedro, 2019-08-01 The orthodox view is that rights complement democracy This book critically examines this view in the context of EU fundamental rights specifically in situations where EU law requires member states to respect EU fundamental rights It first sets out a legal theoretical account of how human rights can complement democracy It argues that they can do so only if they are understood as both the conditions for the democratic process and the outcome of such a democratic process In light of this legal theoretical account of human rights this book examines the demands which the Court of Justice of the EU CJEU imposes on the national orders in respect of EU fundamental rights The conclusion reached is that the demands which EU

fundamental rights impose on national legal orders entail a cost for the democratic legitimacy of those legal orders Ultimately accepting the demands of the CJEU in respect of EU fundamental rights may require the national legal order to abandon its commitment to protecting the human rights which are the foundation of the national legal order s very legitimacy

**Assessment for Experiential Learning** Cecilia Ka Yuk Chan, 2022-09-29 Chan s book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential

learning Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i.e. 21st century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education policies and students approach to learning But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas that arise in assessing students These questions are discussed in detail The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Resources in Education**, 1998 *Religion and Magic in Western Culture* Daniel

Dubuisson, 2016-04-08 In the history of Western culture theology and science a strict dichotomy exists between religion and magic religion as the intellectually and morally superior one magic as the primitive superstitious demonic other The present work aims to break with this tradition and traces the origin of this dichotomy as well as its many purposes Whose powers does it serve Which interests and ideological stakes does it conceal Moreover the author proposes a new epistemological framework for the study of magisms as well as their rehumanisation and argues for a rehabilitation of their studies
