**Essential Readings in World Politics** Jack L. Snyder, 2001-01-01 Offers a collection of essays and excerpts that provide different perspectives on various aspects of world politics and international relations *Nuclear Weapons and Cooperative* Security in the 21st Century Stephen J. Cimbala, 2009-09-10 This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen I Cimbala is Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors

Christian Approaches to International Affairs J. Troy,2012-08-21 Troy analyses how the understanding of religion in Realism and the English School helps in working towards the greater good in international relations studying religion within the overall framework of international affairs and the field of peace studies American Foreign Policy in a Globalized World David P. Forsythe,Patrice C. MacMahon,Andrew Wedeman,2013-05-13 In this volume several leading foreign policy and international relations experts consider the long term prospects and implications of US foreign policy as it has been shaped and practiced during the presidency of George W Bush The essays in this collection based on the research of well respected scholars such as Ole Holsti Loch Johnson John Ruggie Jack Donnelly Robert Leiber Karen Mingst and Edward Luck offer a clear assessment while US resources are substantial Washington's ability to shape outcomes in the world is challenged by its expansive foreign policy goals its exceptionalist approach to international relations serious questions about

the limits of its hard power resources as well as fundamental changes in the global system Illustrating one of the central ironies of the contemporary situation in foreign affairs and international relations that at the very time of the unipolar moment the world has become globalized to such an extent that the unilateralism of the Bush Administration leads as much to resistance as it does to coercion compliance and cooperation American Foreign Policy in a Globalized World will be of interest to students and scholars of politics and international relations Neoclassical realism in European politics Asle Toje,Barbara Kunz,2024-07-30 Realism is making a comeback in Europe This book brings together a new generation of realist scholars It provides a rigorous survey for specialists seeking to understand the dynamics of international relations in a time of change The volume thus seeks to explore the European dimension to neoclassical realism The hope with this book is that it will spark a debate that in time might lead to the re emergence of a distinctly European realist school which draws on the roots of the historical non American realist tradition benefiting from insights in the liberal constructivist paradigm Through detailed case studies the book illustrates that power and influence remain fruitful even indispensable variables through which to understand the formation of foreign policy Perspectives on World Politics Richard Little, Michael Smith, 2006 This third edition substantially revised and updated takes full account of the literature on the post Cold War period and how theories have been influenced by events in the 1990s Nuclear Deterrence in a Multipolar World Stephen J Cimbala, 2017-07-05 The view that America and Russia have burned their candles on security cooperation with respect to nuclear weapons is simply mistaken This timely study identifies twelve themes or issue areas that must be addressed by the United States and Russia if they are to provide shared successful leadership in the management of nuclear world order Designed as supplementary reading in upper division and graduate courses in national security policy defense and nuclear arms control it is also suitable for courses taught at military staff and command colleges and or war colleges Nuclear Weapons in the Information Age Stephen J. Cimbala, 2012-02-02 In today's information age the coexistence of nuclear weapons with advanced conventional weapons and information based concepts of warfare is a military contradiction Nuclear deterrence was initially predicated on geopolitical military and technical assumptions These were based on Cold War politics rational deterrence theory the concept of mutual vulnerability and the fact that information and technology diffusion were limited Today however far from being obsolete nuclear and other weapons of mass destruction have not only survived but have become weapons for states that face security threats including perceived threats of nuclear blackmail or expectation of conflicts This study focuses on this unplanned coexistence of two distinct arts of war including the possibility that states like the U S may be held hostage to nuclear blackmail by outlier regimes or terrorists such as North Korea It shows that restricting nuclear proliferation should still be on the agenda of policymakers and calls for a revitalized global nonproliferation regime This unique survey by a leading expert will appeal to anyone interested in arms control nuclear Understanding the Global Experience Thomas Arcaro, Rosemary Haskell, Chinedu proliferation and defense policy
