## **Estimates Guide Philippines:**

**Estimation of Extreme Wind Speeds and Guide to the Determination of Wind Forces** Emil Simiu, Richard D. Marshall, 1977    *Introduction to Small Area Estimation Techniques* Asian Development Bank, 2020-05-01 This guide to small area estimation aims to help users compile more reliable granular or disaggregated data in cost effective ways. It explains small area estimation techniques with examples of how the easily accessible R analytical platform can be used to implement them particularly to estimate indicators on poverty employment and health outcomes. The guide is intended for staff of national statistics offices and for other development practitioners. It aims to help them to develop and implement targeted socioeconomic policies to ensure that the vulnerable segments of societies are not left behind and to monitor progress toward the Sustainable Development Goals.

**Assessing America's Options in the Philippines**, 1986    The Matrix of Policy in the Philippines Harvey A. Averch, John E. Koehler, Frank H. Denton, 2015-03-08 The prevailing view of the state of Philippine society is bleak: the Philippines is alleged to be suffering from unsatisfactory economic growth, mounting corruption, increasing lawlessness and declining morale. To arrive at an accurate assessment of current problems and future prospects, the authors have undertaken a broad quantitative analysis of politics, economics, crime and dissidence within the country. Addressing the problems systematically, measuring alternative explanations and interpretations, their analysis is directed to a clearer articulation of information and policy decisions within the Philippines and a more realistic view of the country. For the benefit of other social scientists or countries who wish to make a similar study, the appendices list in detail the data used by the authors. Originally published in 1971, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**Guidelines for Estimating Greenhouse Gas Emissions of ADB Projects** Asian Development Bank, 2017-04-01 Developing Asia has the world's fastest growing rate of greenhouse gas emissions, with the leading driver being emissions from power generation. Reducing these emissions is paramount to ensuring a sustainable future while responding to the threat of climate change. This publication provides Asian Development Bank energy sector staff, consultants and other interested readers with an understanding of key concepts and principles for estimating and reporting on the climate change impacts of energy projects. These guidelines provide more detail on estimating the emissions reductions attributable to energy efficiency and renewable energy projects.

Committee on Insular Affairs,1946    **States, Scarcity, and Civil Strife in the Developing World** Colin H. Kahl,2018-06-05 Over the past several decades civil and ethnic wars have undermined prospects for economic and political development destabilized entire regions of the globe and left millions dead States Scarcity and Civil Strife in the Developing World argues that demographic and environmental stress the interactions among rapid

population growth environmental degradation inequality and emerging scarcities of vital natural resources represents one important source of turmoil in today s world Kahl contends that this type of stress places enormous strains on both societies and governments in poor countries increasing their vulnerability to armed conflict He identifies two pathways whereby this process unfolds state failure and state exploitation State failure conflicts occur when population growth environmental degradation and resource inequality weaken the capacity legitimacy and cohesion of governments thereby expanding the opportunities and incentives for rebellion and intergroup violence State exploitation conflicts in contrast occur when political leaders themselves capitalize on the opportunities arising from population pressures natural resource scarcities and related social grievances to instigate violence that serves their parochial interests Drawing on a wide array of social science theory this book argues that demographically and environmentally induced conflicts are most likely to occur in countries that are deeply split along ethnic religious regional or class lines and which have highly exclusive and discriminatory political systems The empirical portion of the book evaluates the theoretical argument through in depth case studies of civil strife in the Philippines Kenya and numerous other countries The book concludes with an analysis of the challenges demographic and

environmental change will pose to international security in the decades ahead
