SAE Truck and Bus Control and Communications Network Standards Manual Society of Automotive Engineers,2001 The J1939 Handbook Supplement is a set of Recommended Practices defining a data network for use in a wide variety of applications with primary emphasis to date on heavy duty vehicles It was designed to support general purpose information transfer as well as the more demanding tasks of distributed control systems on board a vehicle The top level document provides an overview and serves as a master control for common definitions used by multiple applications and industries The J1939 document defines the use of these standards in a particular application or industry allowing J1939 to be tailored as needed without having to include definitions that do not apply The intent of J1939 is to allow plug and play capability for any device that is added to the network This means that components made by different manufacturers can be installed on a common network either during vehicle manufacture or as aftermarket devices and that they will work together This includes devices used in complex systems such as vehicle drivetrains wherein these devices must interact to perform sophisticated control functions As such J1939 represents far more than just a data network By the manner in which data elements and messages are defined and agreed to within the subcommittee it has become a means of performing system engineering and integration across each industry that is using it Highway Equipment Standards Manual Ontario.
