

LOGICAL DIVISION OF IDEAS

Logical division of ideas is a pattern of organization in which you divide a topic into main points and discuss each main point separately (in different paragraph). When you use logical division to organize a paragraph, begin with a topic sentence that presents your division of ideas (your main point) clearly, for example:

There are several reasons that a vegetarian lifestyle is beneficial.

There are three kinds of apps that all smart phones should have.

In the supporting sentences, discuss each main point one after the other. Introduce each main point with a signal word or phrase such as *the first reason...*, *the second type...*, *in addition*, etc.

One reason to be a vegetarian is that it can increase health.

In addition, every smartphone needs mapping software.

Support each main point with a brief explanation, short description, or a convincing detail, such as an example or a statistic (numbers-costs, amounts, percentages, and so on).

Because vegetables have plenty of vitamins and fiber, they play an important role in the prevention of disease.

Apps such as Google Maps offer information for people who are travelling by car, on public transportation, or on foot.

At the end of a paragraph with a logical division pattern, writers usually summarize the main points.

For all these reasons, being a vegetarian is a wise choice.

In brief, people can get the most from their smart phones by loading the right kinds of apps.

Cohesive and Coherent Essay

In a paragraph with unity or cohesion, all the supporting sentences work together to support the topic sentence. Each sentence is directly linked to the topic. A well-written academic paragraph must have coherence in addition to unity. A paragraph with coherence is logical. All the sentences are easy to follow because they are in a logical order and are well connected. There are transition signals to help the reader along the way. For example:

Teenagers, on the other hand, want to feel popular.

High school students have a surprising amount of money to spend, so advertisers research teenage fads and fashions.

The following chart presents several transition signals.
