# CONTROLCAL PIONEER 9G ISFccc PROFILE SET

## USER'S GUIDE

ControlCAL is a control and calibration application for video displays that support the serial/RS-232 communication protocol. For Pioneer plasma displays, it's the only application that provides full access to the ISFccc interface in every Pioneer 7G, 8G, and 9G model that includes it, and it is used by nearly all professional Pioneer calibrators worldwide.

For the do-it-yourself 9G owner/calibrator, ControlCAL's calibration screens allow you to easily activate and adjust your display's built-in ISFccc modes from your computer. Most owners who activate their panel's ISF modes typically start with settings shared on the AVS or Calibration forums, and with ControlCAL, you can easily try different configurations and make your own modifications. Owners who want to take the next step and learn to calibrate their displays are encouraged to invest in calibration equipment and software ([special bundles](#) are available), and visit the [ControlCAL Calibration Forum](#). The forum is an excellent resource for information, advice, and support, whatever your ambition or level of expertise. All ControlCAL users are encouraged to register and participate.
