Recent Developments in Machine Learning and Data Analytics Jugal Kalita, Valentina Emilia Balas, Samarjeet Borah, Ratika Pradhan, 2018-09-11 This book presents high quality papers from an international forum for research on computational approaches to learning It includes current research and findings from various research labs universities and institutions that may lead to development of marketable products It also provides solid support for these findings in the form of empirical studies theoretical analysis or comparison to psychological phenomena Further it features work that shows how to apply learning methods to solve important application problems as well as how machine learning research is conducted The book is divided into two main parts Machine Learning Techniques which covers machine learning related research and

findings and Data Analytics which introduces recent developments in this domain Additionally the book includes work on data analytics using machine learning techniques Stock-Flow-Consistent Models and Institutional Variety Romar Correa, Amelia Correa, 2019-02-15 Orthodox macroeconomics is founded on microeconomics Heterodox economists either reject micro foundations or experiment with behavioural relationships without paying attention to the principles that generate them The book takes off from Michal Kalecki's aphorism about economics being a science that confused stocks and flows Kalecki was famous for presiding over a marriage between Marx and Keynes and all three figure prominently in the volume However the first part of the title is a homage to Wynne Godley who pioneered stock flow consistent modeling in our times The authors exploit lagged values of variables emerging from the definitions Lags also emerge in so called stock flow norms connecting the aggregates Some moving and shaking of identities and a difference or differential equation emerges The requirements for stability of the dynamic systems are illuminating and the reader can stop at structure and history with the first half of the book The conversation with orthodoxy begins with the second part The equivalent equation systems of the first part throw up different pairs of characters whose happiness must be maximised over time The price to pay through the solution process is the confrontation with many ugly expressions but the explicit calculations are undertaken repeatedly only to reassure students through drillwork that tedium is not the same as difficulty The payoffs are that variable transitions in capitalism the second part of the title are captured from a small clutch of identities The movements from backward agriculture to capitalism from golden age capitalism to financialization are modeled A separate chapter is devoted to Europe The policy prescriptions of heterodox economics do not compare with the richness of critique and positive analysis Positive and normative are one in this work the combination of stock flow norms along with forgotten policy variables like the tax rate promising order and stability to economies www.owaysonline.com PHASE - 1 - 1ST MATE D.G. financial markets conditions Accordingly it is important to have in place frameworks to strengthen FMs resilience to adverse capital flows shocks

Closing the Gap Vicky Neale, 2017 Since 2013 mathematicians from around the world have made dramatic progress on a problem in number theory that goes back centuries the Twin Primes Conjecture which asserts that there are infinitely many pairs of prime numbers that differ by 2 for example 17 and 19 is such a pair This book describes two stories that of the recent work on the Twin Primes Conjecture and in parallel the related ideas around primes from the previous two thousand years of mathematics

The In-Situ Approach to Sluicing Jun Abe, 2015-04-15 It has been standardly claimed since Merchant 2001 that island violations can be repaired by simply deleting the categories that induce such violations as witnessed by sluicing an ellipsis construction that deletes TP with a remnant wh phrase This book aims to argue that such repair by ellipsis is simply a myth Alternatively the author argues for what is called the in situ approach to sluicing originally proposed by Kimura 2007 2010 according to which the remnant wh phrase in sluicing stays in situ This approach immediately explains the island insensitivity of sluicing since no overt wh movement is involved in the derivation of this construction Hence it challenges the approach in terms of island repair by ellipsis in that it nullifies the necessity of a repair mechanism This book makes an important contribution to the field in providing an alternative way of approaching ellipsis phenomena that are claimed to induce island repair

Push Factors and Capital Flows to Emerging Markets Mr. Eugenio Cerutti, Mr. Stijn Claessens, Mr. Damien Puy, 2015-06-22 This paper analyzes the behavior of gross capital inflows across 34 emerging markets EMs We first confirm that aggregate inflows to EMs do move considerably We then report three

findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across borrower countries with market structure characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country s institutional fundamentals strongly affecting sensitivities Countries relying more on international funds and global banks are found to be more sensitive to push factors Our findings suggest that EMs need to closely monitor their lenders and investors to assess their inflow exposures to global push factors Lead Market India

Cornelius Herstatt,Rajnish Tiwari,2016-11-26 India is still perceived by some as a developing country that has yet to create world class products of its own However this book shows that in recent years India has emerged as a lead market for frugality driven innovations that are affordable robust and successful even outside its geographic boundaries Many global companies have recognized these changes and are ramping up their local R D capabilities At the same time several Indian firms are venturing out to international shores and gaining access to new markets Using a top down approach the book takes a closer look at systems of innovation at work and presents examples of successful corporate innovations in multiple industries and their contextual conditions **Bank Balance Sheets and External Shocks in Asia: The Role of FXI, MPMs and CFMs**

Zefeng Chen, MissSanaa Nadeem, Mr. Shanaka J Peiris, 2021-01-15 In emerging Asia banks constitute the dominant source of financing consumption and investment and bank balance sheets comprise large gross FX assets and liabilities This paper extends the DSGE model of Gertler and Karadi 2011 to incorporate these key features and estimates a panel vector autoregression on ten Asian economies to understand the role of the banking sector in transmitting spillovers from the global financial cycle to small open economies It also evaluates the effectiveness of foreign exchange intervention FXI and other macroeconomic policies in responding to external financing shocks External financial shocks affect net external liabilities of banks and the exchange rate leading to changes in credit supply by banks and investment For example a capital outflow shock leads to a depreciation that reduces the net worth and intermediation capacity of banks exposed to foreign currency liabilities In such cases the exchange rate acts as shock amplifier and sterilized FXI often deployed by Asian economies can help cushion the economy By contrast with real shocks the exchange rate serves as a shock absorber and any FXI that weakens that function can be costly We also explore the effectiveness of the monetary policy interest rate macroprudential policies MPMs and capital flow management measures CFMs **What Slice of the Pie? Bond Market Boom in Emerging Economies Ms.Diana Ayala Pena, Milan Nedeljkovic, Christian Saborowski, 2015-07-07 This paper studies the determinants of shifts in debt composition among EM non financial corporates We show that institutions and macro fundamentals create an enabling environment for bond market development During the recent boom episode however global cyclical factors accounted for most of the variation of bond shares in total corporate debt The

sensitivity to global factors appears to vary with relative bond market size which we interpret to be associated with liquidity and easy entry and exit rather than local fundamentals Foreign bank linkages help explain why bond markets increasingly substituted for banks in channeling liquidity to EMs Our results highlight the risk of capital flow reversal in EMs that benefited from the upturn in the global financial cycle mostly due to their liquid markets rather than strong fundamentals

Seventh Periodic Monitoring Report on the Status of Implementation Plans in Response to Board-Endorsed IEO Recommendations International Monetary Fund, 2015-04-09 The Seventh PMR includes i a discussion of progress made over the last year on the actions corresponding to four Management Implementation Plans MIPs that were classified as still in progress in the previous PMR and ii an assessment of the progress made in achieving the high level objectives in three areas directly related to those MIPs In addition an update on substantive issues related to five older MIPs agreed since 2007 is provided at the end of the report Three new evaluations have been completed by the IEO since March 2014 In July and August 2015 Management issued the MIPs in response to these evaluations Given that only a short time has passed since their completion progress in addressing the actions contemplated in those MIPs will be discussed in the next PMR

Argentina International Monetary Fund. Western Hemisphere Dept., 2016-11-10 This paper discusses Argentina's investment rate which was well below the average of Latin American countries and that of a peer group of advanced and emerging market countries with a larger gap in private investment Raising investment prospects would be essential to boost economic activity The administration that took office in December 2015 has emphasized the importance of generating an investor friendly environment that allows Argentina to recover some of the growth opportunities lost over the last few decades Although quantifying the capital accumulation gap is a clearly a difficult task one way of doing so is to look at the difference between Argentina's capital labor ratio and that of the selected peer group of countries Argentina's investment rates and capital output ratios are also compared with estimates of their steady state values derived from standard neoclassical growth models Argentina's investment rate would need to increase significantly to eliminate the capital accumulation gap built during the last two decades and this could significantly accelerate GDP growth **Global Financial**

Spillovers to Emerging Market Sovereign Bond Markets Mr. Christian Ebeke, Ms. Annette Kyobe, 2015-06-26 Foreign holdings of emerging markets EMs government bonds have increased substantially over the last decade While foreign participation in local currency sovereign bond markets provides an additional source of financing and reduces sovereign yields it raises concerns about increased sensitivity of yields to shifts in market sentiment The analysis in this paper suggests that foreign participation and an undiversified investor base transmit global financial shocks to local currency sovereign bond markets by increasing yield volatility and beyond a certain threshold amplify these spillovers These estimates are robust to a range of econometric techniques including panel smooth threshold regression **Proceedings of the XVI International**
