Hostile Business and the Sovereign State Michael J. Strauss, 2018-12-14 This book describes and assesses an emerging threat to states territorial control and sovereignty the hostile control of companies that carry out privatized aspects of sovereign authority The threat arises from the massive worldwide shift of state activities to the private sector since the late 1970s in conjunction with two other modern trends the globalization of business and the liberalization of international capital flows The work introduces three new concepts firstly the rise of companies that handle privatized activities and the associated advent of post government companies that make such activities their core business Control of them may reside with individual investors other companies or investment funds or it may reside with other states through state owned enterprises or sovereign wealth funds Secondly imperfect privatizations when a state privatizes an activity to another state s public sector The book identifies cases where this is happening It also elaborates on how ownership and influence of companies that perform privatized functions may not be transparent and can pass to inherently hostile actors including criminal or terrorist organizations Thirdly belligerent companies whose conduct is hostile to those of states where they are active The book concludes by assessing the adequacy of existing legal and regulatory regimes and how relevant norms may evolve

Agricultural Adaptation to Climate Change in Africa Cyndi Spindell Berck, Peter Berck, Salvatore Di Falco, 2018-03-05

A changing climate is likely to have a drastic impact on crop yields in Africa. The purpose of this book is to document the effects of climate change on agriculture in Africa and to discuss strategies for adaptation to hotter weather and less predictable rainfall. These strategies include promoting opportunities for farmers to adopt technologies that produce optimal results in terms of crop yield and income under local agro-ecological and socioeconomic conditions. The focus is on sub-Saharan Africa, an area that is already affected by changing patterns of heat and rainfall. Because of the high prevalence of subsistence farming, food insecurity, and extreme poverty in this region, there is a great need for practical adaptation strategies. The book includes empirical research in Ethiopia, Kenya, South Africa, Tanzania, and other Sub-Saharan countries, and the conclusion summarizes policy-relevant findings from the chapters. It is aimed at advanced students, researchers, extension and development practitioners, and officials of government agencies, NGOs, and funding agencies. It also will provide supplementary reading for courses in environment and development and in agricultural economics.
