Encyclopedia Of Global Archaeology:

Encyclopedia of Global Archaeology ,2013-12-04 Archaeology the study of human cultures through the analysis and interpretation of artefacts and material remains continues to captivate and engage people on a local and global level Internationally celebrated heritage sites such as the pyramids both Egyptian and Mayan Lascaux caves and the statues of Easter Island provide insights into our ancestors and their actions and motivation But there is much more to archaeology than famous sites Ask any archaeologist about their job and they will touch on archaeological theory chemistry geology history classical studies museum studies ethical practice and survey methods along with the analysis and interpretation of artefacts and sites Archaeology is a much broader subject than its public image and branches into many other fields in the social and physical sciences This multi volume work provides a comprehensive and systematic coverage of archaeology that is unprecedented not only in terms of the use of multi media but also in terms of content It encompasses the breadth of the subject along with key aspects that are tapped from other disciplines It includes all time periods and regions of the world and all stages of human development Mostly importantly this encyclopedia includes the knowledge of leading scholars from around the world The entries in this encyclopedia range from succinct summaries of specific sites and the scientific aspects of archaeological enquiry to detailed discussions of archaeological concepts theories and methods and from investigations into the social ethical and political dimensions of archaeological practice to biographies of leading archaeologists from throughout the world The different forms of archaeology are explored along with the techniques used for each and the challenges concerns and issues that face archaeologists today The Encyclopedia of Global Archaeology has two outstanding innovations The first is that scholars were able to submit entries in their own language Over 300 000 words have been translated from French Spanish Portuguese German Italian Japanese Turkish and Russian Many of these entries are by scholars who are publishing in English for the first time This compendium is both a print reference and an online reference work The encyclopedia s second major innovation is that it harnesses the capabilities of an online environment enhancing both the presentation and dissemination of information Most particularly the continuous updating allowed by an online environment should ensure that the Encyclopedia of Global Archaeology is a definitive reference work for archaeology and archaeologists

Japan means ecotone area or the boundary between a village and a forest There as the number of inhabitants declines bears wild boars and other animals increasingly ravage crops sometimes attacking humans as well By showing the regional nature of human animal and human plant interactions in Asia this book provides for the first time a framework for understanding the world s animal and plant human relationships It is assumed that the relationships between humans and animals and plants during this period were diverse including hunting taming semi domestication and full domestication At the same time for regions outside of Asia the extent to which these diverse relationships were adapted and how diversity was formed is explained from the perspective of historical ecology Customers can expect to derive perspectives on the coexistence of human animal and plant animal relationships from this book in the near future The conservation of rare species diverse habitats and biodiversity is a central theme in considering the relationship between modern civilization and the global environment In post industrial Japan one focus has been the protection of iconic animals such as storks crested ibis dugongs and sea turtles while damage to crops and humans by deer wild boars monkeys bears and other common animals has become an important social issue How can the world s 7.7 billion plus people live in harmony with other species We would like to get some hints on how to solve the problems we are facing
