Dacey,John F. Travers,1996 This chronologically organized text is less expensive and briefer than most of the Human Lifespan texts Its numerous examples drawn from education nursing and psychology make the content relevant to students from a variety of majors and backgrounds while a highly praised study guide integrated into the text promotes and reinforces conceptual understanding The new edition includes increased material on cognitive development and expanded coverage of culture *Brute Force* Matt Curtin,2007-10-25 In the 1960s it became increasingly clear that more and more information was going to be stored on computers not on pieces of paper With these changes in technology and the ways it was used came a need to protect both the systems and the information For the next ten years encryption systems of varying strengths were developed but none proved to be rigorous enough In 1973 the NBS put out an open call for a new stronger encryption system that would become the

new federal standard Several years later IBM responded with a system called Lucifer that came to simply be known as DES data encryption standard The strength of an encryption system is best measured by the attacks it is able to withstand and because DES was the federal standard many tried to test its limits It should also be noted that a number of cryptographers and computer scientists told the NSA that DES was not nearly strong enough and would be easily hacked Rogue hackers usually out to steal as much information as possible tried to break DES A number of white hat hackers also tested the system and reported on their successes Still others attacked DES because they believed it had outlived its effectiveness and was becoming increasingly vulnerable The sum total of these efforts to use all of the possible keys to break DES over time made for a brute force attack In 1996 the supposedly uncrackable DES was broken In this captivating and intriguing book Matt Curtin charts DES's rise and fall and chronicles the efforts of those who were determined to master it *Terrorism* Joseba Zulaika, 2009-12-15 In counterterrorism circles the standard response to questions about the possibility of future attacks is the terse one liner Not if but when This mantra supposedly conveys a realistic approach to the problem but as Joseba Zulaika argues in *Terrorism* it functions as a self fulfilling prophecy By distorting reality to fit their own worldview the architects of the War on Terror prompt the behavior they seek to prevent a twisted logic that has already played out horrifically in Iraq In short Zulaika contends counterterrorism has become pivotal in promoting terrorism Exploring the blind spots of counterterrorist doctrine Zulaika takes readers on a remarkable intellectual journey He contrasts the psychological insight of Truman Capote's *In Cold Blood* with The 9 11 Commission Report plumbs the mindset of terrorists in works by Orianna Fallaci and Jean Genet maps the continuities between the cold war and the fight against terrorism and analyzes the case of a Basque terrorist who tried to return to civilian life Zulaika's argument is powerful inventive and rich with insights and ideas that provide a new and sophisticated perspective on the War on Terror
