LOAD CONTROL ADJUSTMENT

Controller should be adjusted so that, for all traffic conditions, trailer brakes will be applied slightly ahead of the tow-car brakes. This will properly distribute the braking load and provide most efficient operation. To adjust controller remove cover and loosen jam nut (see Figure 14), then turn handle to move actuator to the most efficient setting. Try out setting by making a few stops on dry, level pavement then lock setting with jam nut and replace cover. Position of actuator is indicated through slot in top of case. Adjust toward "H" for heavier loads, toward "L" for lighter loads.
