Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian, Chang Liu ,Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model Teacher Education to Enhance Diversity in STEM A.

Anthony Ash II, Greg A. Wiggan, Marcia J. Watson-Vandiver, 2020-12-29 Addressing underlying issues in science education and teacher training which contribute to continued underrepresentation of racial and ethnic minority students in STEM and STEAM subjects and careers this timely volume illustrates how a critical postmodern science pedagogy CPSP can be used effectively to raise awareness of diversity issues amongst preservice teachers Using a case study design consisting of class observations interviews content analysis questionnaires and instructional interventions in preservice teacher training the volume bridges science and multicultural education and investigates how curricular development and teacher preparation can be used to ensure that science education itself promotes diversity within STEM and throughout education Chapters also examine the intersections of science education and science literacy for both students and teachers and in doing so promote the importance of positive and accurate representation of diversity within science and research discourse The book attempts to raise awareness regarding the need for meaningful curricular reform that creates real opportunities to address historical and scientific misinformation while increasing diversity and inclusion in schools and society This important text will be of interest to postgraduate students researchers scholars and preservice teachers in the fields of science and mathematics education STEM multicultural education teacher education urban education and the sociology of education **Earth's**
