Chinese Criminal Entrepreneurs in Canada, Volume II Alex Chung, 2019-03-09

This book explores how the new Asian criminal entrepreneurs in Canada known as The Big Circle Boys (BCB) competitively dominated the Canadian heroin market in the 1990s without a formal organisation or explicit hierarchical structure. Drawing on the market resilience framework, it examines how the BCB smuggled drugs by using social capital, shared resources and trust effectively through their ethnicity. How did they counter external security challenges and promote internal competitive cooperation? Were they able to resolve disputes peacefully by managing internal relations? These questions are answered through an analysis of their networking processes and illustrated in the structural properties and dynamics of their mono ethnic criminal network. For the first time, the BCB players that contributed to the 2001 Canadian and Australian heroin droughts are revealed through intercepted telephone calls and court testimonies. It shows how the BCB collectively switched from heroin to ecstasy since the year 2000. The operation logistics of drug importation and local trafficking are scrutinised. This book speaks to those interested in how a collective of ethnic Chinese career criminals succeeded and failed in the international drugs trade, particularly for scholars and students of social sciences disciplines.

Rome Neil Faulkner, 2013-09-13

The Roman Empire is widely admired as a model of civilisation. In this compelling new study, Neil Faulkner argues that in fact it was nothing more than a ruthless system of robbery and violence. War was used to enrich the state, the imperial ruling classes and favoured client groups. In the process, millions of people were killed or enslaved. Within the empire, the landowning elite creamed off the wealth of the countryside to pay taxes to the state and fund the towns and villas where they lived. The masses of people, slaves, serfs and poor peasants, were victims of a grand exploitation that made the empire possible. This system, riddled with tension and latent conflict, contained the seeds of its own eventual collapse.

American Exporter, 1926 Ski Style Annie Gilbert Coleman, 2004 Coleman traces skiing from its Norse roots and Alpine influences through the utility of ski travel in the winter Rockies to the rise of Colorado resorts Much more than a history of the sport her work explains how the recreation industry sold the experience of skiing and created mythic mountain landscapes with real problems and a ski culture that exalts celebrity and status over the physical act of skiing Jacket

Commerce Reports, 1935-08-17 **Daily Consular and Trade Reports**, 1935 *Human Hierarchies* Melvyn L. Fein, 2012-08-14 Human beings are hierarchical animals Always and everywhere people have developed social ranking systems These differ dramatically in how they are organized but the underlying causal mechanisms that create and sustain them are the same Whether they are on the top or bottom of the heap people attempt to be superior to some other persons or group This is the root of Melvyn L. Fein's thesis presented in *Human Hierarchies: A General Theory* Fein traces the development of changes from hunter-gatherer times to our own techno-commercial society In moving from small to large communities humans went from face-to-face contests for superiority to more anonymous and symbolic ones Societies evolved from hunting bands where the parties knew each other through big men societies chieftainships agrarian empires patronage chains caste societies estate systems and market-oriented democracies Where once small groupings were organized primarily by strong forces such as personal relationships the now standard large groupings are more dependent on weaker forces such as those provided by social roles Bureaucracies and professional roles have become prominent Bureaucracies allow large-scale organizations to maintain control of people by limiting the potential destructiveness of unregulated tests of strength and by clarifying chains of command Their rigidity and unresponsiveness requires that they be supplemented by professional roles At the same time a proliferation of self-motivated experts delegate authority downward thereby introducing a more flexible decentralization This analysis is a unique and significant advance in both the sociology and anthropology of stratification among humans
