Engaging Anthropological Theory A Social And Political History:

Engaging Anthropological Theory MARK. MOBERG, 2024-09-30 The updated third edition of this book scrutinizes anew the history of anthropological theory Covering key concepts and theorists in a lively style *Engaging Anthropological Theory* examines the historical context of anthropological ideas and the contested nature of anthropology itself The book illustrates how anthropological ideas about human diversity are rooted in historical conditions including the West's relationship with colonized societies and the politics of scholarly inquiry itself Exploring anthropological ideas in context helps students understand how they evolved and how they relate to society and history This new edition pays close attention to non canonical figures and scholars of color whose contributions are too often bypassed in disciplinary histories Students and instructors will also appreciate the open ended review questions for each chapter that stimulate critical thought and discussion Extensively Illustrated throughout this engaging text moves away from the dry recitation of past viewpoints in anthropology and shows their continued relevance to modern life

Engaging Anthropological Theory Mark Moberg, 2013 This text offers a fresh look at the history of anthropological theory Anthropological ideas about human diversity have always been rooted in the socio political conditions in which they arose and exploring them in context helps students understand how and why they evolved and how theory relates to life and society

Globalization from Below Gordon Mathews, Gustavo Lins Ribeiro, Carlos Alba Vega, 2012 This book deals ethnographically with economic globalization from below in its broadest sense from producers to traders to vendors to consumers across the globe

History and International Relations Martin Wight, 2023-06-18 *History and International Relations* collects works by the late Professor Martin Wight 1913 1972 an historian and scholar of international relations Wight conducted research on many topics including British colonial history European studies international institutions and the history of states systems and is nonetheless best known for his lectures about the political philosophy of international relations at the London School of Economics 1949 1961 and the University of Sussex 1961 1972 He is widely regarded as an intellectual ancestor and pathbreaker of the English School of international relations even though this term only gained currency nine years after his death The English School is usually construed as signifying an approach to the study of international relations more rooted in historical and humanistic learning than in the social sciences This volume encompasses works in four categories a standards of excellence in scholarship about history and international relations b European integration efforts since 1945 c British policy in the Middle East notably in relation to the 1956 Suez crisis and d European politics in the interwar period leading up to 1939 This last category features four chapters by Wight from the noteworthy Chatham House collection sponsored by the Royal Institute of International Affairs *The World in March 1939* These chapters on Germany and Eastern Europe stand out as exceptionally thorough and discerning owing in part to their reliance on a wealth of primary and secondary sources This collection also includes Wight's reviews of works by Geoffrey Barraclough Marc Bloch Herbert Butterfield R G Collingwood

Functionalist Construction Work in Social Science Peter Sohlberg, 2021-03-30 An understanding of the complex consequences of social processes and social design activities necessitates a holistic systemic perspective systematised in the classic structural functional research tradition which is presented in *Functionalist Construction Work in Social Science* In contrast to fragmented discussions of functionalism and functional analyses the approach here covers a span ranging from ontological epistemological and primarily methodological aspects of functionalism The functionalist tradition in social science is placed in a historic context and problematised from a philosophy of science perspective Unique here is a detailed account of four classic functionalist research programmes with a discussion of functionalism not primarily as a worldview but as systematic knowledge generating research strategies In addition to descriptive and causal questions the importance of a further research question is demonstrated i e the identification of crucial problems of social organisation Functionalist research strategies and functional analysis are of interest for social scientists and students in sociology political science and social anthropology Moreover the book is relevant for researchers and students of philosophy of science and social science methodology

The Ethics of Participation in Environmental Field Research Lydia Gibson, Julia Sauma, 2025-07-28 Local participation is increasingly seen as a central and ethical part of environmental research As such many environmental efforts are becoming increasingly participatory Participation as a string of literature has shown has many political economic social and epistemic consequences and ethics is fluid polyvalent and contextual Right is right wrong is wrong is dangerous rhetoric that centres western experiences and forecloses the myriad realities and relations bundled within and forced upon marginalised experiences Both participation and ethics as concepts and praxis cast decades long shadows over field research particularly in anthropology yet much of these discussions are left at the threshold of interdisciplinary spaces where participation traditional and Indigenous knowledge and co production are brought in to sanitise and legitimise environmental actions Where are our lessons learned and what ought we to make of their absence The first half of this volume offers ethnographic examples that allow us to begin to ask whether participation in the capitalist machinery and colonial legacies of academic knowledge is ever even ethical The second half of the book is dedicated to anti solutions refusals to define problems and approaches in fixed closed terms from which equations calculations and solutions can be derived This book provokes important new discussions about ethical participation in environmental field research by bringing to the fore the fluid nature of both ethics and participation The volume aims to provide critical intervention for students and researchers across natural and social sciences whose fieldwork includes engagement with local communities and stakeholders as well as conservation policymakers and practitioners who consult and work with local communities

The Blue Frontier Ronald C. Po, 2018-08-23 In this revisionist history of the eighteenth century Qing Empire from a maritime perspective Ronald C Po argues that it is reductive to view China over this period exclusively as a continental power with little interest in the sea With a coastline of almost 14 500 kilometers the Qing was not a landlocked state Although it came to be known as an inward looking empire Po suggests that the Qing was integrated into the maritime world through its naval development and customs institutionalization In contrast to our orthodox perception the Manchu court in fact deliberately engaged with the ocean politically militarily and even conceptually The Blue Frontier offers a much broader picture of the Qing as an Asian giant responding flexibly to challenges and extensive interaction on all frontiers both land and sea in the long eighteenth century

The Past is a Future Country Edward Dutton, J.O.A. Rayner-Hilles, 2022-06-30 Since the 1960s the West has moved ever leftwards Equality and feelings are central to the New Religion that rejects all traditional values Yet beneath the institutionally dominant Left stewards a growing and restless Right How has this fractured situation come about What will the future hold In The Past is a Future Country the authors trace it back to the Industrial Revolution Darwinian selection massively weakened meaning that for the first time in history the selfish sick and stupid could survive and reproduce undermining our religious group oriented culture Now the West is scourged by an epidemic of narcissists competing to signal their individuality and moral superiority But their fight for equality is really a fight for self promotion Reflecting this runaway individualism Westerners increasingly don't have children save for those who are genetically resistant to this onslaught the staunchly conservative and religious the eventual inheritors of the earth But there is a dark storm brewing in the demographic data that the authors have analysed There is a burgeoning growth in the population of exceptionally

unintelligent and antisocial people that social welfare systems cannot sustain for much longer The developed world will pass away and the global population that depends on it will crash in the greatest Malthusian Collapse of all time Yet all is not lost The authors show how a resistant class of intelligent religious conservatives will band together to preserve enclaves of civilization that may survive most of the coming apocalypse and from its ashes rebuild a new world A Neo Byzantium
