Gunkel, 2017-09-08 An investigation into the assignment of moral responsibilities and rights to intelligent and autonomous machines of our own making One of the enduring concerns of moral philosophy is deciding who or what is deserving of ethical consideration Much recent attention has been devoted to the animal question consideration of the moral status of nonhuman animals In this book David Gunkel takes up the machine question whether and to what extent intelligent and autonomous machines of our own making can be considered to have legitimate moral responsibilities and any legitimate claim to moral consideration The machine question poses a fundamental challenge to moral thinking questioning the traditional philosophical conceptualization of technology as a tool or instrument to be used by human agents Gunkel begins by addressing the question of machine moral agency whether a machine might be considered a legitimate moral agent that could be held responsible for decisions and actions He then approaches the machine question from the other side considering whether a machine might be a moral patient due legitimate moral consideration Finally Gunkel considers some recent innovations in moral philosophy and critical theory that complicate the machine question deconstructing the binary agent patient opposition itself Technological advances may prompt us to wonder if the science fiction of computers and robots whose actions affect their human companions think of HAL in 2001 A Space Odyssey could become science fact Gunkel s argument promises to influence future considerations of ethics ourselves and the other entities who inhabit this world FUNDAMENTALS OF MACHINE DRAWING SADHU SINGH, P. Machinery Question and the Making of Political Economy 1815-1848 Maxine Berg, 1982-02-04 Dr Berg argues that technical change was one of the foremost theoretical concerns of Ricardo and his successors and the foundation for their distinctly optimistic view of the future. She shows how the Machinery Question fostered the social conditions in which the status of Political Economy as a discipline was established and concludes that by the 1840s the divisions over machinery were firmly embedded in the great rival creeds of the future liberalism and socialism. **Army Appropriation Bill, 1919** United States.
