"FROM DEWEY TO DIGITAL: EVOLUTION OF LIBRARIES IN THE INFORMATION AGE" Mr. Meghanandha C. Editors Dr. Umesha Naik, Dr. Purushothama Gowda M. & Mr. Ravishankara B., 2023-11-21. The speedy development of information communication technology, electronic libraries, digital libraries, availability of e-resources and collective demand of library users has changed the scenario of libraries and library professionals. Today all the users find the instant and desktop-based library and information services. But only a few institute libraries provide that type of services to their end user. This study highlights that out of 56 central universities in India, only a few universities concentrate on web-based library resources and services to their end users. This paper also discusses the information availability in the websites like library URL, OPAC, e-resources, open access resources, etc.

Reconceptualizing Development in the Global Information Age Manuel Castells, Pekka Himanen, 2014-08-29. The conditions in which development—the process by which people individually and collectively enhance their capacities to improve their lives according to their values and interests—operates have significantly changed in the global information age, a period characterized by the technological revolution in information and communication, the rise of the networking form of social organization and the global interdependence of economies and societies. This volume aims to redefine the means and goals of development in this new context, first by characterizing the specific mode of development, informational development, that the authors consider to be the driver of the creation of material wealth in the twenty-first century; secondly, by reconceptualizing human development as the fulfilment of human wellbeing in the multidimensionality of the human experience, ultimately affirming dignity as the supreme value of development; thirdly, by examining the relationship between informational development and human development. After first setting out its analytical framework, the book brings together a diverse set of empirically rich case studies to illustrate this investigation from across the globe: Silicon Valley, Costa Rica, Chile, South Africa, Finland, the European Union, and China, and concludes by attempting to reconceptualize development. It raises important questions and provides observations, including examining the concept of dignity as development, to contribute to a policy debate that should provide specific answers linked to the conditions of each society and be enacted by democratic institutions in a concerted global effort to save humankind while there is still time.
