

## The Digestive System of Mammals

The digestive system of mammals is a complex and fascinating system that is responsible for breaking down food into nutrients that the body can absorb and use for energy and growth. The system is made up of a series of organs that work together to perform this important task.

### The Digestive Tract

The digestive tract is a long tube that runs from the mouth to the anus. The tract is divided into several parts, each of which plays a specific role in digestion.
