

Installing a Service Manually

- `Installutil.exe` is a command-line utility used to install—or uninstall—a Windows Services application manually. The user must have Administrator permissions to use `Installutil.exe`.
- After building your project, use the command line and navigate to the folder that contains your executable file. Then run:

```
installutil MyService.exe
```
- To uninstall the Windows Service, repeat the process, adding the `/u` parameter:

```
installutil /u MyService.exe
```

Note: in these examples, `MyService.exe` is used to represent the name of your project's output. You would replace `MyService.exe` with the file that was created when you built your project.
