RPSC Sr. Teacher English Question Bank Chapterwise Mocktime Publication,101-01-01 Rajasthan Sr Teacher Grade 2 English Question Bank Chapterwise **A Theory of Phonological Features** San Duanmu,2016-03-17 This book outlines a system of phonological features that is minimally sufficient to distinguish all consonants and vowels in the languages of the world The extensive evidence is drawn from datasets with a combined total of about 1000 sound inventories The interpretation of phonetic transcriptions from different languages is a long standing problem In this book San Duanmu proposes a solution that relies on the notion of contrast X and Y are different sounds if and only if they contrast in some language He focuses on a simple procedure to interpret empirical data for each phonetic dimension all inventories are

searched in order to determine the maximal number of contrasts required. In addition, every unusual feature or extra degree of contrast is re-examined to confirm its validity. The resulting feature system is surprisingly simple; fewer features are needed than previously proposed, and for each feature a two-way contrast is sufficient. Nevertheless, the proposal is reliable in that the notion of contrast is uncontroversial, the procedure is explicit, and the result is repeatable. The book also offers discussion of non-contrastive differences between languages, sound classes, and complex sounds such as affricates, consonant glide units, consonant liquid units, contour tones, pre-nasalized stops, clicks, ejectives, and implosives.
