

Genetic Mapping – Map Distance and frequency of Recombination

Physically, a map unit can be defined as the length of the chromosome in which, on average, one cross-over is formed in every 50 cells undergoing meiosis.

(C) Frequency of recombination:

$$r = \frac{1 + 1}{49 + 49 + 49 + 49 + 1 + 1 + 1 + 1} = \frac{2}{200}$$

= 1 percent = 1 map unit = 1 cM

Pediatric Critical Care Study Guide Steven E. Lucking, Frank A. Maffei, Robert F. Tamburro, Neal J. Thomas, 2012-04-10

This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner. **Study Guide and Solutions**

Manual Bruce A. Chase, Peter J. Russell, 2005-06. This student resource contains chapter outlines of text material, solutions to all end of chapter problems, key terms, suggestions for analytical approaches, problem solving strategies, and a variety of additional questions for student practice. Also featured are questions that relate to chapter specific animations and iActivities.
