Complexity and Complex Ecological Systems Stanislaw Sieniutycz, 2023-03-22. Complexity and Complex Ecological Systems is an extension of Elsevier's 2021 book Complexity and Complex Chemical/Electric Systems directed toward the analysis and synthesis of diverse ecological processes running in heterogeneous macrosystems. Contemporary advanced techniques such as averaged analysis, food webs approaches and classical optimization results along with some numerical algorithms are commonly used in ecosystems. This book treats ecological systems as specific functional integrities. In Complexity and Complex Ecological Systems, one can observe how various types of ecological heterogeneities can contribute to flows of living and inanimate parts of the moving pseudo continuum. This book is a valuable reference for scientists, engineers and graduate students of environmental, chemical and biological engineering, helping them better understand complex macroscopic systems and enhance their technical skills in theoretical and practical research. Covers the basic aspects of modeling, analysis, synthesis and optimization of ecological systems. Contains theory of selected ecosystems and explanations of how it can be used in applications. Includes original drawings and drafts that illustrate the properties of diverse ecosystems. Written by an expert in advanced methods of biophysics and macroscopic physics.
